# International E-Workshop On *Basics of Anaesthesia for Nurse Practitioners*

## **Introduction:**

Nurses and Midwives together constitute the largest proportion of health care workforce. In building their capacity, it is essential they require advanced educational preparation in speciality and super speciality services.

Nurse Practitioner in Critical care are prepared to assess and participate in treating patients with critical illness by collaborating with critical care team across the continuum of critical care. The care of patients who have surgery starts with preparation for surgery, anaesthesia, operation, recovery and discharge. In meeting with complex needs of patients who are undergoing surgery and anaesthesia, critical care nurses require a well-developed knowledge base, along with specialist skills in both technological and caring dimensions related to anaesthesia.

The E- Workshop will enable Nurse Practitioners and Critical Care Nurses to:

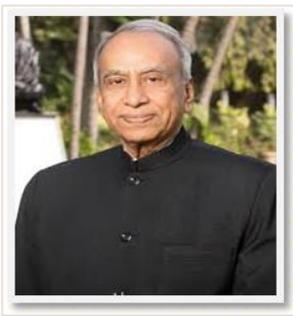

- Describe pre anaesthesia assessment and preparation.
- Explain types and modes of delivery of general anaesthesia.
- Describe peri anaesthetic monitoring.
- Develop skill in airway management.
- Identify post anaesthesia complications and its relevant management.
- Enumerate the role of Nurse Anaesthetist /Clinical Nurse Specialist.
