Nursing is an art; and if it is to be made an art, requires as exclusive a devotion, as hard a preparation as any painter's or sculptor's work; for what is the having to do with dead canvas or cold marble, compared with having to do with the living body.....the temple of God's spirit...... it is one of the fine arts. I have almost said the finest of fine arts.

(Deemed to be University) Grade 'A' Accredited by NAAC

THE VISION

To emerge as a "Centre for excellence" offering nursing education and research of a very high standard to develop professionally competent nurses, recognised for excellence, leadership and compassionate care, in transforming the health locally and globally, by maintaining highest ethical standards.

MISSION

- Provide quality patient care through excellence in nursing education, practice and research
- Academic excellence in nursing through dedication in patient care, commitment to research, innovation in learning and trust in human values.
- Enable the students to develop into outstanding professionals with high ethical standards capable of transforming the health in the global society.
- Achieve these through team efforts making the institution socially diligent trend setter in nursing education.

(Deemed to be University) Grade 'A' Accredited by NAAC

PHILOSOPHY OF THE PROGRAM

MGM New Bombay College of Nursing (NBCON) is a constituent unit of MGM Institute of Health Sciences (MGMIHS) Navi Mumbai. The philosophy of NBCON is in consistent with the philosophy of MGMIHS and Indian Nursing council New Delhi;

We believe that

- Excellency in health care can be achieved through innovative research and through excellence in education of the health care professionals.
- Post graduate programme is essential to prepare nurses to improve the quality of nursing education and practice in India.
- Post graduate programme in nursing builds upon and extends competence acquired at the graduate levels, emphasizes application of relevant theories into Nursing practice, education, administration and development of research skills.
- The programme prepares nurses for leadership position in nursing and health fields who can function as nurse specialists, consultants, educators, administrators and researchers in a wide variety of professional settings in meeting the National priorities and the changing needs of the society.
- This programme provides the basis for the post master programme in Nursing.
- The programme encourages accountability and commitment to lifelong learning which fosters improvement of quality care.

(Deemed to be University) Grade 'A' Accredited by NAAC

M.Sc NURSING PROGRAMME

AIM:

The aim of the postgraduate program in nursing is to prepare graduates to assume responsibilities as nurse specialists, consultants, educators, administrators in a wide variety of professional settings.

OBJECTIVES OF POST BASIC B.Sc NURSING PROGRAMME:

On Completion of the two year M.Sc Nursing programme, the graduate will be able to:-

- 1. Utilize/apply the concepts, theories and principles of nursing science
- 2. Demonstrate advance competence in practice of nursing
- 3. Practice as a nurse specialist.
- 4. Demonstrate leadership qualities and function effectively as nurse educator and manager.
- 5. Demonstrate skill in conducting nursing research, interpreting and utilizing the findings from health related research.
- 6. Demonstrate the ability to plan and effect change in nursing practice and in the health care delivery system.
- 7. Establish collaborative relationship with members of other disciplines
- 8. Demonstrate interest in continued learning for personal and professional advancement.

REGULATIONS FOR EXAMINATION

Eligibility for appearing for the examination:

75% of the attendance for theory and practicals. However 100% of attendance for practical before the award of degree

Classification of results:

- \circ 50% pass in each of the theory and practical separately.
- \circ 50-59% Second division
- o 60-74% first division
- 75% and above is distinction
- For declaring the rank aggregate of 2 years marks to be considered
- If the candidate fails in either practicals or theory paper he/she has to re- appear for both the papers (theory and practical)
- Candidate, who fails in any subject, shall be permitted to continue the studies into the second year. However the candidate shall not be allowed to appear for the Second year examination till such time that he/she passes all subjects of the first year M.Sc nursing examination. The maximum period to complete the course successfully should not exceed 4 years

COURSE OUTLINE

FOR

I YEAR M.Sc. NURSING

(Deemed to be University) Grade 'A' Accredited by NAAC ADAVNCED NURSING PRACTICE

Placement:- First Year

Hours of instructions : -Theory: 150 hrs Practical: 200 hrs Total : 350 hrs

Course Description

The Course is designed to develop understanding concepts of theoretical basis of advanced nursing practice and critically analyze different theories of nursing and other disciplines.

Objectives: At the end of the course students.

- 1. Appreciate and analyze the development of nursing profession.
- 2. Describe ethical, legal, political and economic aspects of health care delivery and nursing practice.
- 3. Explain bio psycho-social dynamics of health, lifestyle and health care delivery system.
- 4. Discuss concepts, principles, theories, models and approaches relevant to nursing and their application.
- 5. Describe scope of nursing practice.
- 6. Provide holistic and competent nursing care following nursing process approach.
- 7. Identify latest trends in nursing and the basis of advanced nursing practice.
- 8. Perform extended and expanded role of nursing.
- 9. Described alterative modalities of nursing care.
- 10. Describe the concept of quality control in nursing.
- 11. Indentify the scope of nursing research.
- 12. Use computer in patient care delivery system.
- 13. Appreciate importance of self development and professional advancement.

CONTENT

Unit	Hours	Learning objectives	Content	Teaching	Assessment method
Ι	10	Describe nursing as a profession Discuss the ethical and legal responsibilities of professional nurse. Explain the role and research, leadership and management in nursing. Explain the role of future nurse	 Nursing as a Profession History of development of nursing as a profession, characteristics, criteria of profession-national global Code of ethics (INC), code of professional conduct, autonomy and accountability, assertiveness, visibility of nurses, legal consideration. Role of regulatory bodies. Professional organizational and union, self defense, individual and collective bargaining. Educational preparation, continuing education, career opportunities, professional advancement, role and scope of nursing education. Role of research leadership and management Quality assurance in nursing Futuristic Nursing 	Lecture cum discussion Seminar 1. Nursing as a Profession 2. History & trends in nursing Group discussion- Ethics in nursing ethical and legal responsibilities of a professional nurse Debate- Scope of nursing education Brainstorming- Nurse as a leader	Seminar Group Discussion Brainstorming Essay Short answer questions
Π	5	Describe the health care delivery system at various levels Describe health plans, policies and planning process	 Health Care delivery Health care environment, economics, constraint, planning process. Health care delivery system- National, State, district and local level Major stake holders in health care systems-government, non government, Industry and other professionals. Pattern of nursing care delivery in India Health care delivery concerns- National health and family welfare programme, intersectoral co-ordination, role of non-government agencies 	Lecture cum discussion Seminar Group discussion on Health Care delivery system Seminar 1. Health planning & management 2. N.R.H.M. role of NGO in health care of community Symposium Health planning in India-Recent trends & issues Panel Discussion Role of nurse in Health care delivery system Visit to telemedicine unit	Seminar Group Discussion Debate Observation Report Essay Short answer questions

Unit	Hours	Learning objectives	Content	Teaching Learning	Assessment method
III	10	Explain basic principles of genetics Illustrate approaches top common genetic disorders Explain the recent trends in genetics Explain the screening methods for genetic disorders Discuss ethical, legal and psychosocial issues in genetic testing Describe the role of nurse in genetic services	 Genetics Review of cellular division, mutation and law of inheritance, human genome project, the genetic era. Basic concept of genes, chromosomes and DNA. Approaches to common genetic disorders. Genetic Testing – Basis of genetic diagnosis, presymptomatic and predisposition testing, prenatal diagnosis & screening. Ethical, legal and psychosocial issues in genetic testing. Genetic Counseling Practical application of genetics in nursing 	Lecture cum discussion Group discussion Ethical legal & psychosocial issues in genetic testing Role Play Genetic counseling & role of nurse	Seminar Group Discussion Role Play Essay Short answer questions
IV	10	Describe the concept, scope, uses methods and approaches of Epidemiology.	 Epidemiology Scope, Epidemiological approach and methods. Morbidity, Mortality, Concepts of causation of disease and their screening. Application of Epidemiology in health care delivery, Health surveillance and health informatics. Role of nurse 	Lecture cum discussion Discussion Role of Community health nurse in the management of an epidemic	Essay Short answer questions

Unit	Hours	Learning objectives	Content	Teaching Learning	Assessment method
VII		Explain nursing process and the various steps of nursing process	 Nursing Process Approach Health assessment illness status of patients- Identification of health illness problems, health behavior, signs and symptoms of clients. Methods of Collection, analysis and utilization of data relevant to nursing process. Formulation of nursing care plan, health goals, implementation, modification and evaluation of care. 	Symposium Nursing process Preparation of nursing care plan	Essay Short answer questions
VIII	30	Describe the growth and development Illustrate psychological aspect & human relations	 Psychological aspect and human relations Human behavior, life processes, growth and development, personality development, defense mechanisms Communication, interpersonal relationship, individual and group, group dynamics and organizational behavior Basic human needs, growth and development, (conception through p[re school, school age through adolescence, young and middle adult and older adult) Sexuality and sexual health Stress and adaption, crisis and its intervention Coping with loss death and grieving Principles and techniques of counseling. 	Lecture cum discussion – Discussion- Review of growth & development Project – Growth and development Role Play- Therapeutic communication counseling Seminar- Stress and anxiety Group dynamics	Seminar Project Role Play Essay Short answer questions

(Deemed to be University)

Unit	Hours	Learning objectives	Content	Teaching Learning	Assessment method
IX	10	Describe alternative modalities of nursing care Illustrate primary health care Explore expanded and extended role of nurse	 Nurse Practice:- Framework, scope and trends Alternative modalities of care, alternative systems of health and complementary therapies. Extended and expanded role of the nurse, in promotive, preventive, curative and restorative health care delivery system in community and Institutions Health promotion and primary health care Independent practice issue- independent practice issue- independent nurse – midwifery Practitioner Collaboration issues and models within and outside nursing Model of prevention Family nursing, home nursing Gender sensitive issues and women empowerment Disaster nursing Evidence based nursing practice-Best practices Transcultural nursing 	Lecture cum discussion Symposium Alternative and complementary therapies in health care Group discussion Extended and expanded role of nurse in preventive, promotive health care delivery Debate- Nurse as an independent practitioner Discussion- Collaboration issues and models within and outside nursing Seminar Holistic approach to health care trans cultural nursing Disaster nursing Role of nurse in geriatrics Visit:-	Essay Seminar Debate Group Discussion Short answer questions Visit
X	25	Demonstrate skill in applying computers in nursing	 Computer application for patient care delivery system and nursing practice Use of Computers in teaching, learning, research and nursing practice. Windows, MS Office: Word, Excel, Power Point Internet, literature search Statistical Packages Hospital Management information system: Soft wares 	Old age home Lecture cum discussion Demonstration	Preparation of power points, word documents

NURSING EDUCATION

Placement: - First year

Hours of instruction: - Theory : 150 Hrs Practical: 150 Hrs Total : 300 Hrs

COURSE DESCRIPTION

This course is designed to assist students to develop a broad understanding of fundamental principles, trends and issues related to education and nursing education. Further, it would provide opportunity to students to understand, appreciate and acquire skills in teaching and evaluation, curriculum development, implementation, maintenance of standard and accreditation of various nursing educational development, implementation, maintenance of standard and accreditation of various nursing educational programs.

Objectives:-

At the end of course, students will be able to:

- 1. Explain the aims of education, philosophies, trends in education and health: its impact on nursing education.
- 2. Describe the teaching learning process.
- 3. Prepare and utilize various instructional media and methods in teaching learning process.
- 4. Demonstrate competency in teaching, using various instructional strategies.
- 5. Critically analyze the existing nursing educational programs their problems, issues and future trends.
- 6. Describe the process of curriculum development, and the need the methodology of curriculum changes, innovation and integration.
- 7. Plan and conduct continuing nursing education programs.
- 8. Critically analyze the existing teacher preparation programs in nursing.
- 9. Demonstrate skill in guidance and counseling.
- 10. Describe the problems and issues related to administration of nursing curriculum including selection and organization of clinical experience.
- 11. Explain the development of standards and accreditation process in nursing education program.
- 12. Indentify research priorities in human education.
- 13. Discuss various models o collaboration in nursing education and services.
- 14. Explain the concept, principles, steps, tools and techniques of evaluation
- 15. Construct, administer and evaluate various tools for assessment of knowledge, skill and attitude.

Unit	Hours	Learning Objectives	Content	Teaching Learning	Assessment method
Ι	10		 INTRODUCTION :- Education: Definition, aims, concepts, philosophies & their education implication. Impact of social, economical, political & technological changes on education: Professional education Current trends and issue in education Educational reforms and national educational policy Trends in development of nursing education in India. Concept of Nursing education. History of Nursing education in India. Philosophy and objectives of Nursing education. Purpose of nursing education in India. Scientific approach in Nursing. Current issues and entering trends in Nursing education. Liberal education and Nursing Education 	Lecture cum discussion	Various philosophies of educational to nursing education. Present the history of nursing education in India, issues & trends in nursing education.
II	20	30	 Elberar education and Nurshig Education TEACHING –LEARNING PROCESS Concepts of learning and learning Definition, theories of teaching and learning, relationship between teaching and learning. Educational aims and objectives; types, domain, levels, elements and writing of educational objectives. Competency based education (CBE) and outcome based education (OBE). Instructional design: Planning and designing the lesion, writing lesion plan: meaning its needs and importance, formats. Instruction strategies : Lecture, discussion, demonstration, simulation, laboratory, Seminar, Panel, symposium, problem based learning,(PBL), workshop, project, role play, (Socio drama), Clinical teaching methods, programmed instruction, self directed learning (SDL), micro teaching, computer assisted learning (CAL), Development of effective study habits. 	Lecture cum discussion	Prepare educational objectives on various domains

(Deemed to be University)

Unit	Hours	Learning Objectives	Content	Teaching Learning	Assessment method
III	10	10	 INSTRUCTIONAL MEDIA AND METHOD Kay concepts in the selection and use of media in education Developing leaning resource material using different media. Instructional Aids – types, uses, sections, preparation, and utilization. Teacher's role in procuring and managing instructional Aids – project and non projected Aids, multimedia, video-tele conferencing etc 	Lecture cum discussion	Visit to IEC bureau
IV	10		 MEASUREMENT AND EVALUATION Concept and nature of measurement and Evaluation, Meaning, Principles, purpose problems in evaluation and measurement. Principles of Assessment- internal assessment external examination, advantages and disadvantages. Criterion and norm referenced evaluation. Evaluation Process Defining objectives for evaluation purposes. Relating evaluation procedures to objectives, formative, and summative evaluation, Characteristics of evaluation. 	Lecture cum discussion	Relate evaluation objectives
V	10	10	 STANDARDIZED AND NON STANDARDIZED TEST Meaning, characteristics, objectivity validity, reliability, usability, norms, construction of tests. Essay, short answer questions and multiple-choice questions. Rating scales, checklists, OSCE/OSPE (Objective structured clinical/practical examination) Differential scales, and summated scales, Sociometry, anecdotal record, attitude scale, critical incident technique. Question bank-preparation, validation, moderation by panel, utilization Developing a system for maintaining Confidentiality 	Lecture cum discussion	Construct tests Reliability Validity

Unit	Hours	Learning Objectives	Content	Teaching Learning	Assessment method
VI	5	5	 ADMINISTRATION, SCORING AND REPORTING OF TESTS Administration a test, scoring, grading versus marks. Objective tests, scoring essay test, methods of scoring, item analysis 	Lecture cum discussion	Construct Tests
VII	10	6	 STANDARDIZED TOOLS Test of intelligence aptitude, interest, personality, achievement, socioeconomic status scale, tests for special mental and physical ability and disabilities. 	Lecture cum discussion	Observe various tests – personality, aptitude & intelligence. Formulate an aptitude test.
VIII	5	20	 NURSING EDUCATIONAL PROGRAMS Perspectives of nursing education: Global and national. Patterns of nursing education and training program in India. Non-university and university programs: ANM, GNM Basic B.Sc Nursing, Post certificate B.Sc. Nursing. M.Sc.(N), M.Phil and Ph.D. Post diploma program, nurse practitioner program 	Lecture cum discussion	Visit to nursing institutions. ANM, GNM, B.Sc, M.Sc.
IX	12	30	 CONTINUING EDUCATION IN NURSING Concepts- Definition, importance, need scope, principles of adults learning, assessments of learning needs, priorities and resources. Program planning, implementation and evaluation, of continuing education programs. Research in continuing education. Distance education in nursing. 	Lecture cum discussion	Plan CNE programme & conduct
X	10	15	 CURRICULUM DEVELOPMENT Definition, curriculum determinants, process & steps of curriculum development, Curriculum models types and framework. Formulation of philosophy, objectives, Mission statement. Selection and organization of learning experiences, Current trends in clinical learning experiences. 		

Unit	Hours	Learning Objectives	Content	Teaching Learning	Assessment method
			 Evaluation strategies, process of curriculum change, role of students, faculty, administrators. Equivalency of courses: transcripts, credit system 	Lecture cum discussion	Prepare the mission statement philosophy, educational objectives for a nursing education programme Formulate educational objectives for various lessons-eg. FON med/surg. Ng selected learning Experiences for a specific subject
XI	8	4	 TEACHER PREPARATION Teacher – roles & responsibilities, function, Characteristics, competencies, qualities. Preparation of professional teacher Organizing professional aspects of teacher Organizing professional aspect of teacher preparation Programs Evaluation: self and peer Critical analysis of various programs of teacher education in India. 	Lecture cum discussion	Application of principles and maxims of teaching formulate question Analysis of ng education programme in Maharashtra / India.
XII	10	5	 GUIDANCE AND COUNSELING Concept and principles of guidance and counseling. Guidance and counseling services: diagnostic and remedial. Coordination and organization of services. Techniques of counseling: Interview, case work and characteristics of counselor. Professional preparation and training for counseling. 	Lecture cum discussion	Role Play

Unit	Hours	Learning Objectives	Content	Teaching Learning	Assessment method
ХШ	15	10	 ADMINISTRATION OF NURSING CURRICULUM Role of curriculum coordinator-planning implementation and evaluation. Evaluation of educational program in nursing course and program Factor influencing faculty staff relationship and techniques of working together. Concept of faculty supervisor (dual) position. Curriculum research in nursing. Different models of collaboration between education and service. 	Lecture cum discussion	Evaluate an educational programme • Presentation
XIV	10		 MANAGEMENT OF NURSING EDUCATIONAL INSTITUTIONS Planning, organizing, staffing, budgeting, recruitment Discipline, public relation Performance appraisal, welfare services, library service, hostels 	Lecture cum discussion	Visit to educational Institutions Plan to set-up a SON/CON
XV	5	5	 DEVELOPMENT AND MAINTANENCE OF STANDARD AND ACCREDITATION IN NURSING EDUCATIONAL PROGRAMS Role of Indian Nursing Council, State Registration Nursing Councils, Boards and University. Role of Professional Association and unions. 	Lecture cum discussion	

(Deemed to be University) Grade 'A' Accredited by NAAC

PLANNED ACTIVITIES:-

- Panel discussion / group presentation Educational Psychology Theories and laws learning and teaching, personality, Intelligence, Individual, Motivation, Group Dynamics
- Framing philosophy, aims and objectives of an educational Institution
- Lesson Planning
- Micro Teaching 2
- Conduct Practice teaching using different teaching strategies 10 (Classroom-5 Demonstration
- Construct a written objective type test for the lessons taken.
- Construct tests, administer and determine reliability and validity.
- Preparation and utilization of instructional aids using different media.
- Design a curriculum for a basic B.Sc Nursing Programme; Develop course plan, units plan, rotation plans, prepare cumulative records for students.
- Prepare rotation plan for clinical practice.
- Planning and organizing field visits.
- Plan, conduct and evaluate a continuing nursing education workshop.
- Annotated bibliography 10
- Critical evaluation of any nursing education program offered by selected institution.
- Educational visit educational institutions GNM, B.Sc., Diploma Course etc.
- Field Visits (INC/SNC) to get familiar with recognition/ registration process.
- Construct, administrator and evaluate tools (objective & essay type test, observation checklist, rating scale etc)
- Observe and practice application of various non-standardized tests (intelligence, aptitude, personality, Sociometry, physical and mental disabilities tests)
- Prepare aptitude test for entrance exams of B.Sc. nursing students.
- Prepare plan for evaluation of the students in the B.Sc. nursing programme.
- Visit to schools

METHODS OF TEACHING

- Lecture cum discussion
- Seminar / Presentation
- Project work
- Field Visits
- Workshop

NURSING RESEARCH AND STATISTICS

Placement: - First year

Hours of Instruction: - Theory:-150 Hrs Practical: -100 Hrs Total: - 240 Hrs

Part A - Nursing Research

Theory: - 100 Hrs **Practical:** - 50 Hrs **Total:** - 150 Hrs

COURSE DESCRIPTION

This course is designed to assist students to acquire an understanding of the research methodology and statistical methods as a basis for identifying research problem, planning and implementing a research plan. It will further enable the students to evaluate research studies and utilize research finding to improve quality of nursing practice, education and management.

General Objectives:

At the end of course, the students will be able to :

- 1. Define basic research terms and concept.
- 2. Review literature utilizing various sources
- 3. Describe research methodology
- 4. Develop a research study
- 5. Communicate research findings
- 6. Utilize research findings
- 7. Critically evaluate nursing research studies.
- 8. Write scientific paper for publication

Grade 'A' Accredited by NAAC

CONTENT OUTLINE

	Н	ours		
Unit	Theory	Practicals	Course Content	
Ι	10		 Introduction: Methods of acquiring knowledge – problem solving and Scientific method. Research – Definition, Operation and Aims of scientific research, characteristics, purposes, kinds of Research Inductive and deductive reasoning Historical Evolution of research in nursing Basic research terms Scope of nursing research: areas, problems in nursing, role of research in nursing health and social research Concept of evidence based practice Ethics in research Research process, Significant criteria of good research 	
II	5	5	Research process, Significant criteria of good research Review of Literature:-	
11	5	5	• Importance, purpose, sources, criteria for selection of resources and step in reviewing literature.	
III	12		 Research Approach and design Importance, characteristics of good research design Threats to internal and external validity. Type: Qualitative and Quantitative Research Observational studies like descriptive, explanatory and exploratory. Experimental Studies: pretest design, post test design, follow up or longitudinal, cohort studies, case control studies, cross sectional studies, interventional studies, panel studies, mixed method. Qualitative: Phenomenology, grounded theory, Ethnography 	
IV	10	5	 Research Problem: Identification of research problem Formulation of problem statement and research objectives Definition of terms: Variables, setting, population Assumptions and delimitations Identification of variables Hypothesis – definition, formulation and types 	

Unit Hours C		Course Content	
Unit	Theory	Practicals	
V	5	5	 Development theoretical/conceptual framework Theories: Nature, characteristics, Purpose and uses Using, testing and developing conceptual framework, Models and theories. Importance of theory application
VI	6		 Sampling Definition of terms: Population, sample and Sample size, sampling criteria Need and importance of sampling, central limit theorem Sampling theory, concept of standard error, Factors influencing sampling Sampling techniques, census and sampling survey. Implication of sampling design, characteristics of a good sampling design. Types: probability and non probability. Estimation of population mean, population proportion, sample size determination through the approach based on precision rate and confidence level. Problems of sampling.
VII	20	30	 Tools and methods of Data collection Concepts of data collection, types of data Data sources, methods/techniques quantitative and Qualitative. Tools for data collection – types, characteristics and their development Test of sound measurement: Validity and reliability of tools Possible source of error in measurement Procedure for data collection
VIII	5		 Implementing research plan Pilot study, review research plan (design), planning for data collection, administration of tool/interventions, collection of data
IX	10	10	 Analysis and interpretation of data Plan for data analysis: quantitative and qualitative Preparing data for computer analysis and presentation. Statistical analysis Interpretation of data, techniques of interpretation Precaution in interpretation Conclusion and generalizations Summary and discussion

(Deemed to be University)

Grade 'A' Accredited by NAAC

Unit	He	ours	Course Content	
Unit	Theory	Practicals	Course Content	
Х	10		Reporting and utilizing research	
			• Communication of research results; oral and written	
			• Writing research report purposes, methods and style-	
			Vancouver, American Psychological	
			Association(APA),Campbell etc	
			• Writing scientific articles for publication: layout of	
			report and significance of report writing	
XI	3	8	Critical analysis of research reports and articles	
XII	4	7	Development and presenting a research proposal	

ACTIVITIES:-

- Annotated Bibliography of research and articles.
- Review of literature of selected topics and reporting
- Formulation of problem statement, objective and hypothesis
- Developing theoretical/conceptual framework.
- Conducting validity and reliability tool
- Preparation of sample research tool
- Conducting validly and reliability of research tool
- Analysis and interpretation of given data
- Developing and presenting research proposal
- Journal club presentation
- Critical evaluation for selected research studies.
- Written a scientific paper

METHODS OF TEACHING

- Lecture cum discussion
- Presentations
- Project
- Classroom exercises
- Journal Club

METHODS OF EVALUATION

- Tests (term)
- Assignments
- Research Critiques
- Presentations Presentation of related researches
- Project Work

(Deemed to be University) Grade 'A' Accredited by NAAC

Part B – Statistics

Hours of Instruction

Theory : 50 Hrs Practical : 50 Hrs Total :100 Hrs

COURSE DESCRIPTION

At the end of the course, the students will be able to develop an understanding of the statistical methods and apply them in conducting research studies in nursing.

General Objectives:

At the end of course, the students will be able to :

- 1. Explain the basic concepts related to statics.
- 2. Describe the scope of statistics in health and nursing
- 3. Organize tabulate and present data meaningfully.
- 4. Use descriptive and inferential statics to predict results.
- 5. Draw conclusions of the study and predict statistical significance of the results.
- 6. Describe vital health of the study and predict statistical significance of the results.
- 7. Use of statistical packages for data analysis.

CONTENT OUTLINE

T T •4	Hours			
Unit	Theory	Practicals	Course Content	
Ι	7	4	Introduction:	
			 Concepts, types, significance and scope of statistics, meaning of data, Type of data semple perspector 	
			• sample, parameter	
			• type and levels of data and their measurement	
			 Organization and presentation of data – Tabulation of data; 	
			• Frequency distribution, relative frequency	
			• Graphical and tabular presentations: bar charts, histograms, frequency polygons, one way scatter plots, box plots, two way scatter plots, line graphs.	

Unit	He	ours	Course Content	
Unit	Theory	Practicals	Course Content	
III	4	5	Measures of variability;	
			• Range, Percentiles, average deviation, quartile deviation,	
			standard deviation Percentile & percentile rank,	
			Cumulative graph, curved ogive	
IV	5	4	Normal Distribution:	
			• Probability, characteristics and application of normal	
			• Probability curve; sampling error.	
			Cumulative distribution, Cumulative graph,	
V	6	8	Measures of relationship:	
			• Correlation – need and meaning	
			• Rank order correlation;	
			Scatter diagram method	
			Product moment correlation	
	2	2	Simple linear regression analysis and prediction.	
VI	3	2	Designs and meaning:	
			• Experimental designs	
			• Comparison in pairs, randomized block design, Latin	
			Squares.	
VII	8	8	Significance of Statistic and Significance of difference	
			between two Statistics (Testing hypothesis)	
			• Non parametric test or distribution free test – Wilcoxon	
			signed rank test, Mann Whitney U test, Kruskal walli's	
			test, Friedman's test and spearman correlation test.	
			• Chi-square test, Sign, median test,	
			• Parametric test – 't' test,	
			• Analysis of variance: one way ANOVA, two way	
			ANOVA, ANOVA in Latin square two way design MANOVA, ANCOVA	
			Analysis of covariance: ANOCOVA, ANOCOVA Technique	
VIII	5	5	Use of statistical methods in psychology and education:	
, 111	5	5	 Scaling – Z Score, Z Scaling 	
			 Standard Score and T Score 	
			 Reliability of test Scores: test-retest method, parallel 	
			forms, split half method.	
IX	4	2	Application of statistics in health:	
	I	2	 Measurement of population: rate, crude rate, specific rate. 	
			 Measurement of population. Fate, crude fate, specific fate. Measurement of fertility: specific fertility rate, total 	
			fertility rate.	
			 Reproductive rate: gross reproduction rate, net 	
			reproduction rate.	
			• Measures related to mortality: crude death rate (CDR), age	
			specific death rate, infant and child mortality rate.	
			Measures related to morbidity.	

Unit	Hours		Course Content		
	Theory	Practicals	Course Con	lent	
IX	4	2	 Application of statistics in health: Measurement of population: rate, crude rate, specific rate. Measurement of fertility: specific fertility rate, total fertility rate. Reproductive rate: gross reproduction rate, net reproduction rate. Measures related to mortality: crude death rate (CDR), age specific death rate, infant and child mortality rate. Measures related to morbidity. 		
X	4	8	 Use of Computers for data analysis Use of computer in data analysis and research, use of software and introduction to SPSS. Importing data from excel, access, tab and comma separated files. Entering data, labeling a variable, coding and recording a categorical and continuous variable, converting a data from string to numerical variable, sorting, filtering, merging, appending data set. Frequencies, descriptive statistics, cross tabulation. diagrammatic presentation including Histogram, bar chart, pie chart, scatter diagram, box plot, line chart. Parametric test of hypothesis- one sample, independent and paired sample t- test, one way ANOVA & post HOC Test. Testing for normality, chi- square test with measures of association, Pearson correlation. 		
 and ar Review topics Formut object Develor framew Condut tool Prepare Condution 	ated Bibliog ticles. w of litera and reportin llation of pr ive and hypo oping theo work. acting validi ration of sam	oblem statement,	 METHODS OF TEACHING Lecture cum discussion Demonstration – on data organization, tabulation, calculation of statistic, use of statistical package, classroom exercise, organization and tabulation of data Computing Descriptive and inferential statistics; vital and heal statistics and use of computer for data entry and analysis using statistical package. 	METHODS OF EVALUATION • Tests (term), Classroom Statistical exercises.

PRACTICAL EXPERIENCE GUIDELINE FOR NURSING RESEARCH: "PROJECT"

Guideline for research project

I Aim: Students will identify the role of nurse in conducting research, writing proposal based on scientific steps and will analyze the data using statistical methods while conducting research project.

II Objectives

- To indentify research problem areas
- To get an opportunity to select topic or problem and to formulate research proposal.
- To follow the steps in plan specific design in nursing research proposal and conducting project.
- To differentiate and plan specific design in nursing research i.e. experimental and nonexperimental including methodology.
- To get an opportunity to frame/construct simple tool or questionnaire to collect data.
- To follow the basic principles of data analysis including simple tables and statistical methods for proceedings and interpretation of data.
- To be familiar to write research report to communicate the findings including bibliography, and future recommendations.
- To present nursing research report as group activity.
- To present nursing research proposal as individual activity.
- Learns to use computers.
- Recognize role of Research in quality nursing care.

III Guide line/Check list to prepare/Nursing research proposal & project

- 1) *Selection of research problem*: Select your interested area of research based on flat need, issues and social concern in nursing field.
 - a) State the problem brief concise, clear.
 - b) State the purpose of selected study & topic
 - c) State objective of study/proposal/project.
 - d) State the hypothesis if necessary (Optional)
 - e) Prepare conceptual framework based on operational definition (Optional).
 - f) Write scope and delimitation of Research Proposal.

(Deemed to be University) Grade 'A' Accredited by NAAC

- 2) Organizing for review of literature
 - AIM a) It ass in to needs to conduct Research project
 - b) To Study related and relevant literature which help to decide conceptual framework and research design to be selected for your study.
 - c) To add specific books, bulletins, periodicals, reports, published dissertations, Encyclopedia, text books.
 - d) Organize literature as per operational definition.
 - e) To prepare summary table for review of literature.(Optional)
- 3) Research Methodology: To determine logical structure & methodology for research project
 - a) Decide and state approach of study i.e. experimental or non-experimental.
 - b) To define / find out variables to observe effects on decided items & procedure (Optional).
 - c) To prepare simple tool or questionnaire or observational check lost to collect data.
 - d) To determine sample and sampling method.
 - i) Mode of selection ii) Criteria iii) Size of sample iv) Plan When, Where and how data will be collected
 - e) To teat validity of constructed tool with experts/teachers opinion.
 - f) To check reliability by implementing tool before pilot study (10% of sample Size)
 - g) To conduct pilot study by using constructed tool for 10% selected sample size.
- 4) Data Collection: To implement prepared tool & to implement constructed tool
 - a) Decide location
 - b) Time
 - c) Write additional information in separate excise book to support inferences and Interpretation.
- 5) Data analysis and processing presentation
 - a) Use appropriate method of statistical analysis i.e. frequency and percentage.
 - b) Use clear frequency tables, appropriate tables, graphs, and figures.
 - c) Interpretation of data:
 - i) In relation to objectives
 - ii) Hypothesis (Optional)
 - iii) Variable of study or project (Optional)
 - iv) Writing concise report

(Deemed to be University) Grade 'A' Accredited by NAAC

6) Writing Research Report

- a) Aims:
 - i) To organized materials to write project report
 - ii) To make comprehensive full factual information
 - iii) To use appropriate languages and style of writing
 - iv) To make authorities documentation by checking, references & bibliography.
 - v) To use computers.
- b) Points to remember
 - a) Develop thinking to write research report.
 - b) Divide narration of nursing research report.
 - c) Use present tense and active voice
 - d) Minimize use of technical languages
 - e) Use simple, straight forward, clear, concise languages
 - f) Use visual aids in front of able, graph and figures
 - g) Treat data confidentially
 - h) Review, rewrite if necessary

(Deemed to be University) Grade 'A' Accredited by NAAC

EVALUATION CRITERIA FOR PROJECT REPORT / DISSERTATION

Sr.No.	. Criteria		Rating			
		1	2	3	4	5
Ι	Statement of the problem					
	1. Significance of the problem selected					
	2. Framing of tile and objectives					
II	Literature Review					
	3. Inclusion of related studies on the topic, and its					
	relevance					
III	4. Operational definition					
	Research Design					
	5. Use of appropriate research design					
	6. Usefulness of the research design to draw the					
IV	inferences among study variables / conclusion					
	Sampling design					
	7. Identification and description of the target population					
	8. Specification of the inclusion and exclusion criteria					
	9. Adequate sample size justifying the study design to					
V	draw conclusions.					
	Data Collection Procedure					
	10. Preparation of appropriate tool					
	11. Pilot study including validity and reliability of tool					
	12. Use of appropriate procedure / method for data					
	collection					
VI	13. Clear and logical organization of the findings					
	Analysis of dates & interpretation					
	14. Clear presentation of the tables (title, table &					
	column heading)					
VII	15. Selection of appropriate statistical tests					
	Ethical Aspects					
	16. Use of appropriate consent process					
	17. Use appropriate steps to maintain ethical aspects					
VIII						
	Interpretation of the findings					
IX	18. Consistent and appropriate discussion of the					
	findings					
	Conclusion					
X	19. Summary and recommendations for to nursing					
	Practice/Education / Administration					
	Presentation / Report Writing					
	20. Organization of the project work including					
	languages and style of presentation.

	Marks Obtained					

(Deemed to be University) Grade 'A' Accredited by NAAC

FIRST YEAR M.Sc. NURSING

NURSING EDUCATION AND STATISTICS

GUIDELINES TO CRITIQUE RESEARCH STUDY

1. TITLE

• A good title suggesting key variants and the study population.

2. ABSTRACT

• Clear and consider summarizing the main features of the report (problem, methods, results and conclusion)

3. INTRODUCTION

> Statement of the problem

- The problem stated is unambiguous and easy to identify
- The problem ha significance for nursing
- There is a good match between the research problem and the paradigm and methods used, An appropriate quantitative approach

> Hypotheses or research questions

- Research questions and / or hypotheses are explicitly stated, if not their absence should be justified
- Questions and hypotheses are appropriately worded, with clear specification of key variables and the study population
- The questions and hypotheses are consistent with the literature review and the conceptual framework.

Literature review

- The literature review is up to date and based mainly on primary sources.
- The reviews provides the state of the art synthesis of evidence on the research problem
- The Literature review provided a solid basis for the new study
- Conceptual / theoretical framework
- Key concepts are adequately defined conceptually
- There is a conceptual theoretical frame work, rationale and / or map, and it is appropriate

4. METHOD

Protection of participant's rights

- Appropriate procedures are used to safeguard the rights of the study participants and the study subject to external review.
- The study is designed to minimize the risks and minimize benefits to the participants

> Research design

- The most rigorous possible design to be used, given the purpose of the research
- Appropriate comparison are made to enhance
- internal and external validity of the study e.g.(is blinding used, is attrition minimized)

> Population and sample

- The Population is identified and described and the sample is described n sufficient details
- The best possible sampling design is used to enhance the sample's representativeness and the sample biases are minimized
- The sample size is adequate and a power analysis is used to estimate the sample size needs

(Deemed to be University) Grade 'A' Accredited by NAAC

> Data Collection and measurement

- The operational and conceptual definitions are congruent
- Key variables are operationalized using the best possible method e.g.(interviews, observations) with adequate justification
- The specific instruments are adequately described and they are good choices given the study purpose and study population
- The report provides evidence that the data collection methods yield data that high on reliability and validity

> Procedures

- The intervention if present is adequately described and is properly implemented. The participates allocated to the group actually receive the intervention
- The data is collected in a manner that is minimizes bias. The staff who collects the data is well trained

5. RESULTS

Data Analysis

- Analysis is undertaken to address each research question or test each hypothesis
- Appropriate statistical methods is used, given the level of the measurements of the variable, number of group being compared and so on.
- Type I and Type II errors are avoided or minimized
- > Findings
 - The findings are adequately summarized with good use of tables and figures.
 - Findings are reported in a manner that facilities a meta analysis, and with sufficient information needed for evidence based practice

6. Discussion

> Interpretation of the findings

- All major findings are interpreted and discussed within the prior research and or the study's conceptual framework
- The interpretations are consistent with the results and with study's limitations
- The report address the issue of genralizability of the findings

7. Global Issues

> Presentation

- The report is well written, well organized and sufficiently detailed for critical analysis
- The report is written in a manner that makes the findings accessible to practicing nurses

> Researcher credibility

• The researchers clinical, substantive, or methodological qualifications and experience enhance confidence in their findings and their interpretation

Summery assessment

- The study findings appear to be valid, despite any identified limitations. There is confidence in the truth value of the results
- The study contributes meaningful evidence that can be used in nursing practice or that is useful to the nursing discipline.

CLINICAL SPECIALITY - I MEDICAL SURGICAL NURSING

Placement: First Year

Hours of instruction Theory : -150 Hours Practical :- 650 Hours Total :- 800 Hours

Course Description

This course is common for the students undergoing clinical specialty-II in neuro science nursing/cardiovascular & thoracic nursing/critical care nursing/oncology nursing/orthopedic and rehabilitation nursing/nephro & urology nursing, gastroenterology nursing/ geriatric nursing.

It is designed to assist students in developing expertise and in depth knowledge in the field of medical Surgical Nursing. It will help students to appreciate the patient as a holistic individual and develop skill to function as a specialized Medical-Surgical Nurse. It will further enable the student to function as educator, manager and researcher in the field of Medical – Surgical Nursing.

Objectives

At the end of the course the students will be able to:

- 1. Appreciate the trends & issues in the field of Medical Surgical Nursing as a specialty.
- 2. Apply concepts & theories related to health promotion.
- 3. Appreciate the client as a holistic individual.
- 4. Perform physical, psychosocial assessment of Medical Surgical patients.
- 5. Apply Nursing process in providing care to patients.
- 6. Integrate the concept of family centered nursing care with associated disorder such as genetic, congenital and long-term illness.
- 7. Recognize and manage emergencies with Medical- Surgical patients.
- 8. Describe various recent technologies & treatment modalities in the management of critically ill patients.
- 9. Appreciate the legal & ethical issues relevant to Medical Surgical Nursing.
- 10. Prepare a design for layout and management of Medical Surgical Units.
- 11. Appreciate the role of alternative systems of Medicine in care of patients.
- 12. Incorporate evidence based Nursing practice and identify the areas of research in the field of Medical Surgical Nursing.
- 13. Recognize the role of Nurse practitioner as a member of the Medical Surgical health team.
- 14. Teach Medical Surgical nursing to undergraduate nursing students & in-service nurses.

(Deemed to be University)

Grade 'A' Accredited by NAAC

COURSE CONTENT

UNIT	HOURS	CONTENT
Ι	5	Introduction:
		Historical development of Medical- Surgical Nursing in India.
		• Current status of health and disease burden in India. Current concept of health.
		• Trends & issues in Medical – Surgical Nursing.
		• Ethical & cultural issues in Medical – Surgical Nursing Rights of patients.
		• National health policy, special laws & ordinances relating to older people.
		• National goals and Five year plans.
		• National health programs related to adult health.
II	20	Health Assessment of patients
		History taking.
		Physical examination of various systems.
		• Nutritional assessment.
		Related investigations and diagnostic assessment.
III	5	Care in hospital settings:
		Ambulatory care.
		• Acute and Critical care, Long term care, Home Health Care.
		• Characteristics, care models, practice settings, interdisciplinary team.
		• Hospitalization- effects of hospitalization on the patient & family.
		• Stressors & reactions related to disease process.
		Nursing care using Nursing process approach.
IV	10	Management of patients with disorders of Gastro intestinal tract
		• Review of anatomy and physiology.
		Common Disorders-etiology, Patho physiology, Clinical manifestations,
		complications, prognosis.
		• Health assessment-History taking, physical examination, investigation and
		diagnostic assessment.
		Treatment modalities and trends.
		Nursing management.Related research studies.
		 Related research studies. Evidence based nursing practice.
		Rehabilitation and follow-up.
V	10	Management of patients with disorders of nervous system
•	10	Review of anatomy and physiology.
		 Common Disorders-etiology, Pathophysiology, Clinical manifestations,
		complications, prognosis.
		• Health assessment-History taking, physical examination, investigation and
		diagnostic assessment.
		• Treatment modalities and trends.
		• Nursing management.
		• Related research studies.
		• Evidence based nursing practice.
		• Rehabilitation and follow-up.

UNIT	HOURS	CONTENT
VI	10	Management of patients with disorders of respiratory system
		Review of anatomy and physiology.
		Common Disorders-etiology, Pathophysiology, Clinical manifestations,
		complications, prognosis
		• Health assessment-History taking, physical examination, investigation and
		diagnostic assessment.
		• Treatment modalities and trends.
		• Nursing management.
		Related research studies.
		• Evidence based nursing practice.
		Rehabilitation and follow-up.
VII	10	Management of patients with disorders of cardio vascular system
		Review of anatomy and physiology.
		Common Disorders-etiology, Pathophysiology, Clinical manifestations,
		complications, prognosis.
		• Health assessment-History taking, physical examination, investigation and
		diagnostic assessment.
		• Treatment modalities and trends.
		Nursing management.
		Related research studies.
		• Evidence based nursing practice.
X7TT	_	Rehabilitation and follow-up.
VIII	5	Management of patients with disorders of blood
		• Review of anatomy and physiology.
		Common Disorders-etiology, Pathophysiology, Clinical manifestations,
		complications, prognosis.
		Health assessment-History taking, physical examination, investigation and diagnostic assessment
		 diagnostic assessment. Treatment modalities and trends.
		Nursing management.
		 Related research studies
		 Evidence based nursing practice
		 Rehabilitation and follow-up
IX	10	Management of patients with disorders of genito urinary system
		 Review of anatomy and physiology.
		 Common Disorders- etiology, Pathophysiology, Clinical manifestations,
		complications, prognosis.
		 Health assessment-History taking, physical examination, investigation and
		diagnostic assessment.
		• Treatment modalities and trends.
		 Nursing management
		Related research studies
		• Evidence based nursing practice.
		• Rehabilitation and follow-up.

UNIT	HOURS	CONTENT
X	10	Management of patients with disorders of endocrine system
		• Review of anatomy and physiology.
		• Common Disorders-etiology, Pathophysiology, Clinical manifestations,
		complications, prognosis.
		• Health assessment-History taking, physical examination, investigation and
		diagnostic assessment.
		• Treatment modalities and trends.
		• Nursing management.
		• Related research studies.
		• Evidence based nursing practice.
		Rehabilitation and follow-up.
XI	10	Management of patients with disorders of musculo-skeletal system
		• Review of anatomy and physiology.
		Common Disorders-etiology, Pathophysiology, Clinical manifestations,
		complications, prognosis.
		• Health assessment-History taking, physical examination investigation and
		diagnostic assessment.
		• Treatment modalities and trends.
		• Nursing management.
		Related research studies.
		• Evidence based nursing practice.
VII	10	Rehabilitation and follow-up.
XII	10	Management of patients with disorders of Integumentary system
		• Review of anatomy and physiology.
		Common Disorders-etiology, Pathophysiology, Clinical manifestations,
		complications, prognosis.
		Health assessment-History taking, physical examination, investigation and diagnostic assessment
		diagnostic assessment.
		Treatment modalities and trends.Nursing management.
		Related research studies.
		Evidence based nursing practice.
		Rehabilitation and follow-up.
XIII	5	Management of patients with disorder of Eye and ENT
	e	 Review of anatomy and physiology
		 Common Disorders-etiology, Pathophysiology, Clinical manifestations,
		complications, prognosis.
		 Health assessment-History taking, physical examination, investigation and
		diagnostic assessment.
		 Treatment modalities and trends.
		• Nursing management.
		 Related research studies.
		Evidence based nursing practice.
		 Rehabilitation and follow-up.

UNIT	HOURS	CONTENT
XIV	8	Management of patients with disorders of reproductive system
		• Review of anatomy and physiology.
		Common Disorders-etiology, Patho physiology, Clinical manifestations,
		complications, prognosis.
		• Health assessment-History taking, physical examination, investigation and
		diagnostic assessment.
		• Treatment modalities and trends.
		• Nursing management.
		• Related research studies.
		• Evidence based nursing practice.
		Rehabilitation and follow-up.
XV	8	Geriatric nursing
		 Nursing Assessment-History and Physical assessment.
		• Ageing; Demography; Myths and realities.
		• Concepts and theories of ageing.
		Cognitive Aspects of Ageing.
		 Normal biological ageing.
		• Age related body systems changes.
		 Psychosocial Aspects of Aging.
		Medications and elderly.
		• Stress & coping in older adults.
		Common Health Problems & Nursing Management;
		Psychosocial and Sexual.
		• Abuse of elderly.
		• Role of nurse for care of elderly: ambulation, nutritional, communicational, psychosocial and spiritual.
		• Role of nurse for caregivers of elderly.
		• Role of family and formal and non formal caregivers.
		• Use of aids and prosthesis (hearing aids, dentures)
		• Legal & Ethical Issues.
		 Provisions and Programmes for elderly; privileges, Community Programs and health services;
		• Home and institutional care.
		• Issues, problems and trends.
XVI	8	Management of patients with communicable & sexually transmitted diseases:
		Review of immune system.
		 Common Disorders of immune system – HIV/AIDS. Review of infectious
		disease process.
		• Communicable Diseases- etiology, Pathophysiology, Clinical manifestations,
		complications, prognosis.
		• Health assessment-History taking, physical examination, investigation and
		diagnostic assessment. Treatment modalities and trends.
		• Nursing management. Related research studies. Evidence based nursing
		practice. Rehabilitation and follow-up.

UNIT	HOURS	CONTENT
XVII	8	Emergency, trauma and multi-system organ failure
		• DIC (disseminated intravascular coagulation) Trauma, burns, poisoning
		• Etiology, Pathophysiology, Clinical manifestations, complications, prognosis.
		• Health assessment-History taking, physical examination, investigation and
		diagnostic assessment.
		• Treatment modalities and trends.
		• Nursing management.
		Related research studies.
		Evidence based nursing practice.
		Rehabilitation and follow-up.

PRACTICALS

Total Hours Prescribed= 650 Hours

Sr. No.	Department/Unit	No. of Hours
1	General Medical Ward	120
2	General Surgical Ward	120
3	ICU	120
4	Oncology	50
5	Ortho	60
6	Cardiology	60
7	Emergency Department	60
8	Neuro	60
	TOTAL	650

Student Activities:

- Clinical presentations
- History taking
- Health Assessment
- Nutritional Assessment
- Health Education related to disease conditions
- Case studies
- Project work
- Field visits

CLINICAL SPECIALITY – I MEDICAL SURGICAL NURSING PROFORMA & GUIDELINES FOR CASE PRESENTATION

I Patent Biodata

Name, Age, Sex Religion, Marital status, Occupation, Source of health care, Date of admission, Provisional Diagnosis, Date of surgery if any.

II Presenting complaints

Describe the complaints with which the patient has been brought to the hospital

III Socio-economic status of the family:

Monthly income, expenditure on health, food, education etc.

IV History of Illness (Medical & Surgical)

- i) History of present illness onset, symptoms, duration, precipitating/ aggravating factors
- ii) History of past illness surgery, allergies, medications etc.
- iii) Family history Family tree, history of illness in the family members, risk factors congenital problem, psychological problem etc.

V Diagnosis (Provisional & Confirmed) Description of disease: Includes the followings

- 1. Definition
- 2. Etiology & risk factors
- 3. Pathophysiology
- 4. Clinical features.

VI Physical Examination of Patient (Date & Time)

Physical examination: with date and time. Clinical features present in the book Present in the Patient

VII Investigations

CLINICAL SPECIALITY-I

OBSTETRIC AND GYNECOLOGICAL NURSING

Placement: First Year

Hours of Instruction Theory :- 150 Hours. Practical :- 650 Hours. Total :- 800 Hours.

Course Description

This course is designed to assist students in developing expertise and in-depth understanding in the field of Obstetric and Gynecological Nursing. It will help students to appreciate the client as a holistic individual and develop skill to function as an independent midwifery practitioner. It will further enable the student to function as educator, manager, and researcher in the field of Obstetric and Gynecological nursing

Objectives

At the end of the course the students will be able to:

- 1. Appreciate the trends in the field of midwifery, obstetrics and gynecology as a speciality.
- 2. Describe the population dynamics and indicators of maternal and child health
- 3. Describe the concepts of biophysical, psychological and spiritual aspects of normal pregnancy, labor and puerperium.
- 4. Provide comprehensive nursing care to women during reproductive period and newborns.
- 5. Integrate the concepts of family centered nursing care and nursing process approach in obstetric and gynecological nursing.
- 6. Identify and analyze the deviations from normal birth process and refer appropriately.
- 7. Describe the pharmacological agents, their effects during pregnancy, child birth, puerperium, lactation and the role of nurse
- 8. Counsel adolescents, women and families on issues pertaining to pregnancy, child birth and lactation
- 9. Describe the role of various types of complementary and alternative therapies in obstetric and gynecological nursing.
- 10. Incorporate evidence based nursing practice and identify the areas of research in the field of obstetric and gynecological nursing.
- 11. Describe the recent advancement in contraceptive technology and birth control measures
- 12. Appreciate the legal and ethical issues pertaining to obstetric and gynecological nursing

(Deemed to be University)

Grade 'A' Accredited by NAAC

UNIT	HOURS	COURSE CONTENT		
Ι	10	Introduction		
		Historical and contemporary perspectives		
		• Epidemiological aspects of maternal and child health		
		Magnitude of maternal and child health problems		
		• Issues of maternal and child health : Age, Gender, Sexuality,		
		psycho Socio cultural factors		
		Preventive obstetrics		
		• National health and family welfare programmes related to maternal and child health: health care delivery system-		
		• National Rural health mission, Role of NGO's		
		• Theories, models and approaches applied to midwifery practice		
		• Role and scope of midwifery practice: Independent Nurse midwifery practitioner		
		• Legal and Ethical issues: Code of ethics and standards of midwifery		
		practice, standing orders Evidence based midwifery practice		
		Research priorities in obstetric and gynecological nursing.		
II	15	Human reproduction		
		Review of anatomy and		
		• physiology of human reproductive system: male and female		
		Hormonal cycles		
		• Embryology		
		Genetics, teratology and counseling		
		Clinical implications		
III	25	Pregnancy		
		Maternal adaptation : Physiological, psychosocial		
		• Assessment – Maternal and foetal measures Maternal measures:		
		History taking, examination-General, physical and obstetrical measure,		
		identification of high risk, foetal measure, identification of high risk, Foetal measures – clinical parameters, biochemical-human estriol,		
		Maternal Serrum Alfa Feto Protein, Acetylcholine esterase (AchE),		
		Triple Test Amniocentesis, Cordocentesis, chorionic villus sampling		
		(CVS),		
		Biophysical- (US IMAGING, Foetal movement count, Ultra		
		Sonography, Cardiotocography, cardiotomography, Non Stress		
		Test(NST), Contraction stress test(CST), amnioscopy, foetoscopy,		
		Radiological examination. Interpretation of diagnostic tests and nursing implications		
		• Nursing management of the pregnant women, minor disorders of		
		pregnancy and management, preparation for child birth and parenthood,		
		importance of institutional delivery, choice of birth setting, importance		
		and mobilizing of transportation, prenatal counseling, role of nurse and		
		crisis intervention, identification of high risk pregnancy and refer		
		• Alternative/complementary therapies Interpretation of diagnostic tests and nursing implications Nursing management of the pregnant women, minor		
		disorders of pregnancy and management, preparation for child birth and		
		parenthood, importance of institutional delivery, choice of birth setting,		
		parenthood, importance of institutional derivery, choice of birth setting,		

(Deemed to be University) Grade 'A' Accredited by NAAC

		Grade II Recreated by Mille
		importance and mobilizing of transportation, prenatal counseling, role of nurse and crisis intervention, identification of high risk pregnancy and
		refer Alternative/complementary therapies
IV	25	Normal Labour and nursing management:
		Essential factors of labour, Stages and onset
		First stage: Physiology of normal labour
		• Use of partograph: Principles, use and critical analysis, evidence based
		studies
		Analgesia and anesthesia in labour
		Nursing management
		Second stage
		Physiology, intrapartum monitoring
		• Nursing management.
		• Resuscitation, immediate newborn care and initiate breast feeding
		(Guidelines of National neonatology forum of India) Third stage
		 Physiology and nursing management Fourth stage – Observation, critical analysis and Nursing management.
		 Various child birth practice: water birth, position change etc Evidence based practice in relation to labour intervention
		• Evidence based practice in relation to labour intervention Role of nurse midwifery practitioner
V	20	Alternative/complementary therapies Normal puerperium and nursing management
•	20	 Physiology of puerperium
		 Physiology of lactation, lactation management, exclusive breast feeding,
		Baby friendly hospital initiative(BFHI)
		Assessment of postnatal women.
		Minor discomforts and complications of puerperium.
		• Management of mothers during puerperium: Postnatal exercises Rooming
		in, bonding, warm chain Evidence based studies
		Role of nurse midwifery practitioner
		Alternative/complementary therapies
VI	20	Normal Newborn
		Physiology and characteristics of normal newborn
		Physical and Behavioural assessment of newborn
		Needs of newborn
		• Essential newborn care: Exclusive breast feeding,
		• Immunization, Hygiene measures, Newborn nutrition
		• Organization of neonatal care, services(Levels), transport, neonatal
		intensive care unit, organization and management of nursing services in
		NICU
		 Observation and care of newborn Parenting process

(Deemed to be University)

Grade 'A' Accredited by NAAC

VII 10 December dynamics in chetotying					
VII	10	Pharmoco dynamics in obstetrics			
		• Drugs used in pregnancy, labour, post partum and newborn			
		Calculation of drug dose and administration			
		• Effects of drugs used			
		Anaesthesia and analgesia in obstetrics			
		Roles and responsibilities of midwifery nurse practitioner			
		• Standing orders and protocols and use of selected life saving drugs and			
		interventions of obstetric emergencies approved by the MOHFW			
VIII	10	Family welfare services			
		Population dynamics			
		• Demography trends: vital statistics, calculation of indicators especially			
		maternal and neonatal mortality rates and problems and other health			
		problems			
		Recent advancement in contraceptive technology			
		Role of nurses in family welfare programmes in all settings			
		Role of independent nurse midwifery practitioner			
		• Family life education			
		Evidence based studies			
		Information, Education and Communication(IEC)			
		Management information and evaluation system(MIES)			
		Teaching and supervision of health team members			
IX	5	Infertility			
		Primary and secondary causes			
		Diagnostic procedures			
		 Counseling: ethical and legal aspects of assisted reproductive 			
		technology(ART)			
		• Recent advancement in infertility management.			
		Adoption procedures			
		• Role of nurses in infertility management.			
X	5	Menopause			
		• Physiological, psychological and social aspects			
		Hormone Replacement Therapy			
		Surgical menopause			
		Counseling and guidance			
		Role of midwifery nurse practitioner			
XI	5	Abortion			
		• Types, causes			
		 Legislations, Clinical rights and professional responsibility 			
		 Abortion procedures 			
		Complications			
		 Nursing management 			
		 Role of midwifery nurse practitioner 			
		Kor of midwhery nuise practitioner			

(Deemed to be University) Grade 'A' Accredited by NAAC

PRACTICAL

Total Hours prescribed = 650 Hours

1 week = 30 Hours

Sr.No.	Dept./Unit	No. of Week	Total Hours
1	Anetenatal Wards & OPDs	4	120
2	Labour Room	5	150
3	Postnatal Ward	2	60
4	Family Planning Clinics	2	50
5	PHC/Rural maternity settings	4	120
6	Gynae	2	60
7	Maternity OT	2	60
8	NICU	1	30
	Total	22 Weeks	650

Procedures observed

- Diagnostic investigations : amniotcentecis, chordocentecis, chorionic villi sampling
- Infertility management: artificial reproduction : artificial insemination, invitro fertilization, and related procedures

Procedures assisted

• Medical termination of pregnancy,

Procedures performed

- Antenatal assessment-20
- Postnatal assessment-20
- Assessment during labour : use of partograph 20
- Per vaginal examination-20
- Conduct of normal delivery-20
- Episiotomy and suturing-10
- Setting up of delivery areas
- Insertion of intra uterine devices(copper T)

Others

- Identification of high risk women and referral
- Health education: to women and their families
- Motivation of couples for planned parenthood

(Deemed to be University)

Grade 'A' Accredited by NAAC

Procedure to be performed

- Health education, counseling and mother craft classes
- Antenatal immunization
- Assessment of intra uterine fetal well-being
- Universal precautions-effectively infection control methods
- Vaginal examination and interpretation (early pregnancy, labour, post partum)
- Utilization of partograph, cervicograph
- Conduction of safe delivery
- Episiotomies suturing
- Manual removal of placenta, placental examination
- Postnatal removal of placenta, palcenatal examination
- Management of breast engorgement, While leg
- Postnatal counseling
- Breast care, breast exam and drainage breast abcess
- Postnatal exercise
- Newborn assessment Ruling out congenital anomalies
- Neonatal resuscitation
- Apgar score
- Monitoring neonates Clinically refill time, Assessment of jaundice
- Gastric Lavage
- Gastgric gavages
- Care of child in multi channel monitor and ventilator
- Care of child in radiant, warmer and incubutator
- Kangaroo care
- Anthropomentrics measurement
- Neonatal reflexes
- Breast feeding
- Parental Nutrition & fluid balance / infusion pump
- Feeding technique
- Medication-Oral, I.D.I.M.I.V.
- Capillary blood sample collection
- Oxygen therapy
- Phototherapy
- Chest physiotherapy

Methods of Teaching

- Lecture cum discussion
- Demonstration
- Seminar / Presentation
- Project Work
- Field Visits

Methods of evaluation

- Written Tests
- Class room / Clinical Teaching
- Presentation
- Written assignment

(Deemed to be University) Grade 'A' Accredited by NAAC

LIST OF BOOKS RECOMMENDED FOR OBSTRETRICS GYNAECOLOGY & NEONATOLOGY

- 1. Buckley Kathleen and Kule Nancy W, "High Risk Maternity Nursing Mannual" Edn, Williams & Wilkin, 1993, Philadelphia.
- 2. Bennet V Ruth & Brown K. Linda, "Myle" text Book for Midwives, ELBS, Churchill Livingstone
- 3. Calander, R & Miller, 'Obstetrics illustrated' IV edn, Churchill & Livingstone Newyork, 1993
- 4. Dawn C.S. "Textbook of Obstetrics and Neonatology", Dawn Books, Calcutta.
- 5. Dawn C.S. "Textbook of Gynecology and contraception", Dawn Books, Calcutta.
- 6. D.C. Dutta, "Textbook of Obstetrics", Vth edn, New Delhi Agency (p) Calcutta 2001.
- 7. D.C. Dutta, "Textbook of Gynecology", Vth edn, New Delhi Agency (p) Calcutta 2001.
- 8. Daftary Shrish N EL AL, "Holland and brews Manual of Obstetrics", XVI edn, B.I. Chutchill Livingstone Pvt. Ltd., New Delhi.

FIRST YEAR M.Sc. NURSING

CLINICAL SPECIALTY –I

CHILD HEALTH (PAEDIATRIC) NURSING

Placement : Ist Year

Hours of Instruction Theory :- 150 Hours Practical :-650 Hours Total :- 800 Hours

Course Description

This course is designed to assist students in developing expertise and in-depth understanding in the field of Pediatric Nursing. It will help students to appreciate the child as a holistic individual and develop skill to function as neonatal and pediatric nurse specialist. It will further enable the student to function as educator, manager, and researcher in the field of Paediatric nursing.

Objectives

At the end of the course the students will be able to:

- 1. Appreciate the history and developments in the field of pediatrics and pediatric nursing as a specialty
- 2. Apply the concepts of growth and development in providing care to the pediatric clients and their families.
- 3. Appreciate the child as a holistic individual
- 4. Perform physical, developmental, and nutritional assessment of pediatric clients
- 5. Apply nursing process in providing nursing care to neonates & children
- 6. Integrate the concept of family centered pediatric nursing care with related areas such as genetic disorders, congenital malformations and long term illness.
- 7. Recognize and manage emergencies in neonates
- 8. Describe various recent technologies and treatment modalities in the management of high risk neonates
- 9. Appreciate the legal and ethical issues pertaining to pediatric and neonatal nursing
- 10. Prepare a design for layout and management of neonatal units
- 11. Incorporate evidence based nursing practice and identify the areas of research in the field of pediatric/neonatal nursing
- 12. Recognize the role of pediatric nurse practitioner and as a member of the pediatric and neonatal health team
- 13. Teach pediatric nursing to undergraduate students & in-service nurses

MGM INSTITUTE OF HEALTH SCIENCES, KAMOTHE, NAVI MUMBAI (Deemed to be University)

Grade 'A' Accredited by NAAC

COURSE CONTENT

UNIT	HOURS	CONTENT
Ι	10	Introduction
		• Historical development of Pediatrics and Pediatric Nursing in India;
		• Current status of child health in India;
		• Trends in Pediatrics and Pediatric Nursing,
		• Ethical and cultural issues in pediatric care
		Rights of children
		• National health policy for children, special laws and ordinances relating to children.
		National goals,
		• Five year plans,
		• National health programs related to child health.
II	10	Assessment of pediatric clients
		History taking
		Developmental assessment
		Physical assessment
		Nutritional assessment
		Family assessment
III	10	Hospitalized child
		• Meaning of hospitalization of the child, preparation for hospitalization, effects of hospitalization on the child and family
		 Stressors and reactions related to developmental stages, play activities
		for ill hospitalized child.
		• Nursing care of hospitalized child and family - principles and practices
IV	15	Pre-natal Pediatrics
		• Embryological and fetal development, Prenatal factors influencing growth and development of fetus,
		• Genetic patterns of common pediatric disorders, chromosomal
		aberrations, genetic assessment and counseling legal and ethical aspects
		of genetic, screening and counseling role of nurse in genetic counseling,
		Importance of prenatal care and role of pediatric nurse.
V	15	Growth and Development of children
		• Principles of growth and development,
		• Concepts and theories of growth and development,
		• Developmental tasks and special needs from infancy to adolescence,
		developmental milestones,
		• Assessment of growth and development of pediatric clients,
VI	15	Factors affecting growth and development. Behavioral Pediatrics and Pediatric Nursing
VI.	13	
		 Parent child relationship, Basic behavioral pediatric principles and specific behavioral pediatric
		• Basic behavioral pediatric principles and specific behavioral pediatric concepts/disorders- maternal deprivation, failure to thrive, child abuse, the battered child,
		 Common behavioral problems and their management,
		 Child guidance clinic.

MGM INSTITUTE OF HEALTH SCIENCES, KAMOTHE, NAVI MUMBAI (Deemed to be University)

Grade 'A' Accredited by NAAC

UNIT	HOURS	CONTENT	
VII	15	Preventive Pediatrics and Pediatric Nursing	
		 Concept, aims and scope of preventive pediatrics, Maternal health and its influence on child health antenatal aspects of preventive pediatrics, Immunization, expanded program on immunization/ universal immunization program and cold chain, Nutrition and nutritional requirements of children, changing patterns of patterns of children. 	
		 feeding, baby- friendly hospital initiative and exclusive breast feeding, Health education, nutritional education for children Nutritional programs National and international organizations related to child health, Role of pediatric nurse in the hospital and community. 	
VIII	30	Neonatal Nursing	
		 New born baby- profile and characteristics of the new born, Assessment of the new born, Nursing care of the new born at birth, care of the new born and family, High risk newborn- pre term and term neonate and growth retarded babies, Identification and classification of neonates with infections, HIV & AIDS, Ophthalmia neonatorum, congenital syphilis. High risk new born- Identification, classification and nursing management Organization of neonatal care, services (Levels), transport, neonatal intensive care unit, organization and management of nursing services in NICU. 	
IX	30	IMNCI	
		(Integrated management of neonatal and childhood illnesses)

PERFORMA & GUIDELINES FOR EXAMINATION AND ASSESSMENT POF NEW BORN

I] Biodata of Baby & Mother

05 Marks

Name of the baby (if any): Age: Birth weight: Present weight: Mother's Name: Period of gestation: Date of Delivery: Identification band applied: Type of delivery: Normal / Instrumental / Operation Place of delivery: Hospital / Home Any problems during birth: Yes / No If Yes explain: Antenatal history: Mother's age: Height: Weight: Nutritional status of mother: Socio-economic background:

II] Examination of the baby:

Characteristics in the baby Comparison with the normal

- 1. Weight
- 2. Length
- 3. Head circumference
- 4. Chest circumference
- 5. Mid-arm circumference
- 6. Temperature
- 7. Heart Rate
- 8. Respiration

III] General behavior and observations

- 1. Color :
- 2. Skin/Lanugo:
- 3. Vernix Caseosa:
- 4. Jaundice:
- 5. Cyanosis:
- 6. Rashes:
- 7. Mongolian spot:
- 8. Birth marks:
- 9. Head:

- Anterior fontanel :

- Posterior Fontanel:
- Any cephalhematoma / caput succedaneum
- Forceps marks (if any)
- Eyes : Face:
 - Cleft lip / palate

PERFORMA & GUIDELINES FOR ASSESSMENT OF GROWTH & DEVEOLOPMENT (Age group: Birth to 5 vrs)

	(Age group: Ditti to 5 yis)	
I] B	iodata of Baby & Mother	01 Marks
	Name of the Child:	
	Age:	
	Sex:	
	Date of Admission:	
	Diagnosis:	
	Type of delivery: Normal / Instrumental / Operation	
	Place of delivery: Hospital / Home	
	Any problems during birth: Yes / No	
	If Yes explain:	
	Order of birth:	
II] G	rowth & development of Child & comparison with Normal:	02 Marks
	Anthropometry In the Child normal	
	1. Weight	
	2. Length	
	3. Head circumference	
	4. Chest circumference	
	5. Mid-arm circumference	
	6. Dentition	
III]	Milestones of Development	02 Marks
	1. Responsive smile	
	2. Responsive to Sound	
	3. Head control	
	4. Grasps objet	
	5. Rolls over	
	6. Sits alone	
	7. Crawls or creeps	
	8. Thumb-finger co-ordination (Perhension)	
	9. Stands with support	
	10. Stands alone	
	11. Walks with support	
	12. Walks alone	
	13. Climbs steps	
	14. Runs

IV

IV]Social, Emotional & Languages Development:	02 Marks
Social & emotional development In Child Comparison with the normal	
Responds to closeness when held	
Smiles in recognition	
Recognize mother	
Seated before a mirror, regards image	
Discriminates strangers	
Wants more than one to play	
Say Mamma, Papa	
Responds to name, no or give it to me	
Increasingly demanding	
Offers check to be kissed	
Can speak single word	
Use pronouns like I, Me, You	
Asks for food, drinks, toilet,	
Plays with doll	
Gives full name	
Can help put things away	
Understands difference between boy & girl	
Washes hands	
Feeds himself/herself	
Repeats with number	
Understands under, behind, inside, outside	
Dresses and undresses	
V] Play habits	02 Marks
Child's favorite toy and play:	
Does he play alone or with other children?	
VI]Toilet training	02 Marks
Is the child trained for bowel movement & if yes, at what age:	
Has the child attained bladder control & if yes, at what age:	
Does the child use the toilet?	
VII] Nutrition	02 Marks
• Breast feeding (As relevant to age)	
 Weaning has weaning started for the child: Yes/ No If yes, at what age weaning diet. 	e & specify the
Any problems observed during weaning:	
Meal pattern at home	02 Marks
Sample of a day's meal: Daily requirements of Chief nutrients:	
Breakfast: Lunch: Dinner: Snacks:	
VIII] Immunization status & schedule of completion of immunization.	02 Marks
IX]Schooling	02 Marks

Does the child attend school?

If Yes, Which grade and report of school performance:

,		
(Deemed to be University)		
Grade 'A' Accredited by NAAC		
XI]Parent child relationship	01 Marks	
How much time do the parents spend with the child?		
Observation of parent-child interaction:		
XII] Explain parental reaction to illness and hospitalization.	01 Marks	
XIII] Child's reaction to the illness & hospital team		
XIV] Identification of needs on priority		
XV] Conclusion	01 Marks	
XVI] Bibliography	01 Marks

PERFORMA & GUIDELINES FOR CASE STUDY

I] Patient's Biodata

Name, Age, Sex, Religion, Marital Status, Occupation, Source of Health Care, Date of Admission, Provisional Diagnosis, Date of Surgery if any.

II] Presenting complaints

Describe the complaints with which the child has been admitted to the ward.

III] Child's Personal data:

- Obstetrical history of mother
- Prenatal & natal history
- Growth & Development (Compare with normal)
- Immunization status
- Dietary pattern including weaning
- Nutritional status
- Play habits
- Toilet training habits
- Sleep pattern
- Schooling

IV]Socio-economic status of family:

Monthly income, expenditure on health, food education

V] History of Illness

- 1. History of present illness onset, symptoms, during, precipitating/ aggregating factors
- 2. History of past illness Illness, hospitalizations, surgeries allergies.
- 3. Family History Family tree, family history of illness, risk factors, congenital problem, psychological problem.

VI]Diagnosis:- Provisional & confirm.

VII] Description of disease: Included the following:

- 1. Definition
- 2. Related anatomy and physiology
- 3. Etiology & risk factor
- 4. Path physiology
- 5. Clinical features

VIII] Physical Examination of patient

Clinical features present in the book present in the patient

IX]Investigations:-

Date Investigation done Result Normal value Inference

X] Management – Medical / Surgical

- Aims of Management
- Objectives of Nursing Care Plan

(Deemed to be University) Grade 'A' Accredited by NAAC

XI]Medical Management

Sr.No. Drug (Pharmacological Name) Dose Frequency / Time Action Side effects & drug interaction Nurse's responsibility

XII] Nursing Management (Use Nursing Process) (Short Term & long Term Plans) Assessment Nursing Diagnosis Objective Plan of care rationale Implementation Evaluation.

XIII] Complications

Prognosis of the Patient

XIV] Day to day progress report of the patient

XV] Discharge Planning

CLINICAL SPECIALITY – I COMMUNITY HEALTH NURSING TERM PAPER - EVALUATION CRITERIA

Placement: 1st Year

Hours of Instructions: Theory: - 150 hours Practical:- 650 hours Total:- 800 hours

Course Description

The course is designed to assist students in developing expertise and in-depth understanding in the field of Community Health Nursing. It would help students to appreciate holistic life style of individuals, families & groups and develop skills to function as Community Health Nurse specialist/practitioner. It would further enable student to function as an educator, manager and researcher in the field of Community Health nursing.

Objectives

At the end of the course, the student will be able to:

- 1. Appreciate the history and development in the field of Community Health and Community Health Nursing.
- 2. Appreciate role of individuals and families in promoting health of the Community.
- 3. Perform physical, developmental and nutritional assessment of individuals, families and groups.
- 4. Apply the concepts of promotive, preventive, curative and rehabilitative aspects of health while providing care to the people.
- 5. Apply nursing process approach while providing care to individuals, families, groups and community.
- 6. Integrate the concepts of family centered nursing approach while providing care to the community.
- 7. Recognize and participate in the management of emergencies, epidemics and disasters.
- 8. Apply recent technologies and care modalities while delivering community health nursing care.
- 9. Appreciate legal and ethical issues pertaining to community health nursing care.
- 10. Conduct community health nursing care projects.
- 11. Participate in planning, implementation and evaluation of various national health and family welfare programmes at local, state and the national level.
- 12. Incorporate evidence based nursing practice and identify the areas of research in the community settings.
- 13. Participate effectively as a member of Community Health team.
- 14. Coordinate and collaborate with various agencies operating in the community by using intersectoral approach.
- 15. Teach community health nursing to undergraduates, in-service nurses and the community health workers.
- 16. Demonstrate leadership and managerial abilities in community health nursing practice

MENTAL HEALTH (PSYCHIATRIC) NURSING

Placement : First Year

Hours of Instruction

Theory:- 150 hours Practical:- 650 hours Total :- 800 hours

Course Description

This course is designed to assist students in developing expertise and in-depth understanding in the field of Psychiatric Nursing. It will help students to appreciate the client as a holistic individual and develop skill to function psychiatric nurse specialist. It will further enable the student to function as educator, manager, and researcher in the field of Psychiatric nursing

Objectives

At the end of the course the students will be able to:

- 1. Appreciate the trends and issues in the field of psychiatry and psychiatric nursing.
- 2. Explain the dynamics of personality development and human behaviour.
- 3. Describe the concepts of psychobiology in mental disorders and its implications for psychiatric nursing
- 4. Demonstrate therapeutic communications skills in all interactions
- 5. Demonstrate the role of psychiatric nurse practitioner in various therapeutic modalities
- 6. Establish and maintain therapeutic relationship with individual and groups
- 7. Uses assertive techniques in personal and professional actions
- 8. Promotes self-esteem of clients, others and self
- 9. Apply the nursing process approach in caring for patients with mental disorders
- 10. Describe the psychopharmacological agents, their effects and nurses role
- 11. Recognize the role of psychiatric nurse practitioner and as a member of the psychiatric and mental health team
- 12. Describe various types of alternative system of medicines used in psychiatric settings
- 13. Incorporate evidence based nursing practice and identify the areas of research in the field of psychiatric nursing

(Deemed to be University) Grade 'A' Accredited by NAAC

COURSE CONTENT

UNIT	HOURS	CONTENT			
Ι	15	Introduction			
		Mental Health and Mental Illness			
		Historical perspectives			
		• Trends, issues and magnitude			
		Contemporary practices			
		Mental health laws/Acts			
		• National mental health program -National mental health authority, stat mental health authority			
		Human rights of mentally ill			
		Mental Health/ Mental Illness Continuum			
		Classification of mental illnesses-ICD, DSM			
		Standards of Psychiatric nursing			
		Challenges and Scope of psychiatric nursing			
		Multi-disciplinary team and role of nurse			
		Role of psychiatric nurse- extended and expanded			
II	10	Concepts of Psychobiology

PSYCHIATRIC NURSING HISTORY COLLECTIVE FORMAT

I Demographic data:

- Name
- Age
- Sex
- Marital Status
- Religion
- Occupation
- Socio-economic status
- Address
- Informant
- Information (Relevant or not) adequate or not

II Chief Complaints / Presenting complaints (List with duration)

- In patients own words and in informants own words. E.g.:- Sleeplessness x 3 weeks
- Loss of appetite & hearing voices x 2 weeks
- Talking to self

III Present psychiatric history/nature of the current episode

- Onset Acute (Within a few hours)
- Sub acute (Within a few days)
- Gradual (Within a few weeks)
- Duration Days, weeks or months
- Course Continuous/ episodic
- Intensity/ same / increasing or decreasing
- Precipitating factors Yes / No (If yes explain)
- History of current episode (explain in details regarding the presenting complaints)
- Associated disturbances included present medical problems (E.G. Disturbance in sleep, appetite, IPR & Social functioning, occupation etc).

IV Past Psychiatric history:

- Number of episode with onset and course
- Complete or incomplete remission
- Duration of each episode
- Treatment details and its side effects if any
- Details if any precipitating factors if present

(Deemed to be University) Grade 'A' Accredited by NAAC

Grade 'A' Accredite

V a) Past Medical History

- b) Past Surgical History
- c) Obstetrical History (Female)

VI Family History :-

- Family Genogram – 5 Generations include only grandparents. But if there is a family history Include the particular generation

VII Personal History:-

- Pre-nantal history Maternal infections
- Exposure to radiation etc.
- Check ups
- Any complications
- Natal history Type of delivery
- Any complications
- Breath and cried at birth
- Neonatal infections
- Mile stones : Normal or delayed Behaviour during childhood
- Excessive temper tantrums
- Feeding habit
- Neurotic symptoms
- Pica
- Habit disorders
- Execratory disorders etc.

Illness during childhood

- Look specifically for CNS infections
- Epilepsy
- Neurotic disorders
- Malnutrition

Schooling

- Age of going school
- Performance in the school
- Relationship with peers
- Relationship with teachers (Specifically look for learning disability and attention deficit)
- Look for conduct disorders E.G. Truancy, Stealing

VIII Occupational history

- Age of Joining job
- Relationship with superiors, subordinates & colleagues
- Any Change in the job if any give details
- Reasons for changing jobs
- Frequent absenteeism

(Deemed to be University) Grade 'A' Accredited by NAAC

IX Sexual history

- Age of attaining puberty (female menstrual cycles are regular)
- Source and extent of knowledge about sex, any exposures
- Marital Status: with genogram.
- X Pre morbid personality: (Personality of a patient consists of those habitual attitudes and patterns of behaivior which characterize an individual. Personality sometimes changes after the onset of an illness. Get a description of the personality before the onset of the illness. Aim to build up a picture of the individual, not type, enquiry with respect to the following areas.)
 - **1.** Attitude to others in social and sexual relationship:- Ability to trust other, mark and sustain Relationship, anxious or secure, leader to follower, Participation, responsibility, capacity to make decision, dominant or submissive, friendly or emotionally cold, etc. Difficulty in role taking –gender, sexual, familial.
 - **2. Aptitudes to self:-** Egocentric, Selfish, indulgent, dramatizing, critical, depreciatory, over concerned, self conscious, satisfaction or dissatisfaction with work. Attitudes towards Health and bodily functions. Attitude to past achievements and failure, and to the future.
 - **3. Moral and religious attitude and standards:-** Evidence of rigidly or compliance, permissiveness or over conscientiousness, conformity, or rebellion. Enquiry specifically about religious beliefs. Excessive religiosity.
 - **4. Mood:-** Enquiry about stability of mood, mood swings, whether anxious, irritable, worrying or tense. Whether lively or gloomy. Ability to express and control feelings of anger, anxiety, or depression.
 - **5. Leisure activities and hobbies:-** Interest in reading, play, music, movies etc. Enquiry about creative ability. Whether leisure time is spend alone or with friends. Is the circle of friends large or small?
 - **6. Fanstacy Life:-** Enquire about content of day dreams and dreams. Amount of time spent in day dreaming.
 - **7. Reaction pattern to stress:-** Ability to tolerate frustrations, losses, disappointments, and circumstance arousing anger, anxiety or depression. Evidence for the excessive use of particular defense mechanisms such as denial, rationalization, projection etc.

8.Habits :- Eating, Sleeping and excretory functions.

CLINICAL SPECIALITY – I MENTAL HEALTH NURSING

MENTAL STATUS EXAMINATON (MSE) FORMAT

I General appearance and behavior (GAAB):

- a) Facial expression (E.G. Anxiety, Pleasure, Confidence, Blunted, Pleasant)
- b) Posture (Stooped, stiff, guarded, normal)
- c) Mannerisms (Stereotype, negativism, tics, normal)
- d) Eye to eye contact (maintained or not)
- e) Rapport (Built easily or not built or built with difficulty)
- f) Consciousness (conscious or dowry or unconscious)
- g) Behaviour (includes social behaviour, E.g. Overfriendly, disinherited, preoccupied, aggressive, normal)
- h) Dressing and grooming well dressed/appropriate/inappropriate (to season and situation) neat and tidy/dirty.
- i) Physical features :- Look older/younger than his or her age/under weight/over weight/ physical deformity.

II Psychomotor Activity:-

Increase / decreased / Compulsive/echopradxia/ Stereotypy / irrelevant automatic obedience)

III Speech: One sample of speech (verbatim in 2 or 3 sentences)

- a) Coherence coherent / incoherent
- b) Relevance (answer the questions appropriately) relevant /irrelevant.
- c) Volume (Soft, loud or normal)
- d) Tone (high pitch, low pitch, or normal/monotonous)
- e) Manner Excessive formal /relaxed/inappropriately familiar.
- f) Reaction time (time taken to answer the question)-increased, decreased or normal

IV Thought:

- a) Form of thought /formal thought disorder not understandable / normal/ circumstantiality / tangentiality / neologism / word salad/ preservation / ambivalence).
- b) Stream of thought / flow of thought pressure of speech / flight of ideas/ thought retardation/ mutism /aphonia / thought block / Clang Association.)
- c) Content of thought
 - Delusions specify type and give example Persecutory/ delusion of reference / delusions of influence or passivity/hypochondracal delusions /delusions of grandeur / nihilistic- Dereralization / depersonalization / delusions of infidelity.
 - ii. Obsession
 - iii. Phobia
 - iv. Preoccupation
 - v. Fantasy Creative / Day dreaming

(Deemed to be University)

Grade 'A' Accredited by NAAC

V Mood (Subjective) and after (Objective) :

- a. Appropriate/inappropriate Relevance to situation and thought congruent.
- b. Pleasurable affects-Euphoria / Elation / Exaltation / Ecstasy
- c. Unpleasurable affects Grief / mourning / depression.
- d. Other affects-Anxiety / fear / Panic/free floating anxiety/apathy/ aggressive / moods swing / emotional liability

VI Disorders Perception:

- a. Illusion
- b. Hallucinations (Specify type and give example) auditory / visual/ olfactory / gustatory /tactile
- c. Others hypnologic / hypnopombic /Lilliputian / kinesthetic / macropsia / micropsia

VII Cognitive functions :

a) Attention and concentration:

- Method of testing (asking to list the months of the year forward and backward)
- Serial subtractions (100-7)

b) Memory:

- a) Immediate (Teach an address a& after 5 mts. Asking for recall)
- b) Recent Memory 24 hrs recall
- c) Remote : Asking for dates of birth or event which are occurred long back
 - i) Amnesia / paramnesia / retrograde amnesia / anterograde amnesia
 - ii) Confabulation
 - iii) Déjà vu / Jamaes Vu
 - iv) Hypermnesia

c) Orientation:

- a. Time approximately without looking at the watch, what time is it?
- b. Place Where he / she is now?
- c. Person who has accompanied him or her

d) **Abstraction :** Give a proverb and ask the inner meaning (E.g. feathers of a bird flock together / rolling stones gather no mass)

e) Intelligence & General Information : Test by carry over sums/ similarities and differences / and general information / digit score test.

f) Judgment : Personal (Future plans)

- Social (Perception of the society)
- Test (Present a situation and ask their response to the situation)

g) Insight:-

- a) Complete denial of illness
- b) Slight awareness of being sick
- c) Awareness of being sick attribute it to external/physical factor.
- d) Awareness of being sick, but due to something unknown in himself.
- e) Intellectual insight
- f) True emotional insight

(Deemed to be University) Grade 'A' Accredited by NAAC

VIII General Observations :-

- a) Sleep
 - I. Insomnia temporary / persistent
 - II. Hypersomnia temporary / persistent
 - III. Non-organic sleep wake cycle disturbance
 - IV. EMA-Early Morning Awakening
- b) Episodic disturbances Epilepsy / hysterical / impulsive behaviour/ aggressive behaviour /destructive behaviour

PROCESS RECORDING FORMAT

I] BASE LINE DATA OF CLIENT

II] List of nursing problems identifies through history, MSE and systematic observation

- III] List of objective of interactions based on the problem identified and learning need of
 - a) Client b) Student

(Note: The above data are obtained and recorded on initial contact. Later as each day's interactions are planned, the following format has to be followed)

2. DATE AND TIME DURATION:

3. SETTING: General ward / patient's unit

4. OBJECTIVES TO BE ATTAINED IN THAT PARTICULAR INTERACTION:

1)______2)

Participant	Conversation	Inference	Therapeutic	Comm	Tech
Used					

5. NATURE OF TERMINATION OF INTERACTION:

Evaluation by the student:

- 1) Your General impression about the interaction (This could included whether TNPR maintained, use of TCT, CO-operation of client etc.)
- 2) Whether objectives achieved, and to what extent If not why and how do you intend to achieve it.
- 3) Summery of your inferences

Evaluation by teacher

- a) Overall recording
- b) Phases of nurse patient relationship
- c) Use of Therapeutic Communication Techniques
- d) Ability to achieve objectives

NOTE :- Limit objectives to one or two and make all efforts to attain the objectives.

At the end of the process recording mention if you were able to achieve the objectives and to what extents. If not, how you intend to achieve it and what hindered you from achieving it. Maintained a therapeutic nurse-patient relationship (TNPR) in all you interactions and use many therapeutic communications of the participants

COURSE OUTLINE

FOR

II YEAR M.Sc. NURSING

(Deemed to be University) Grade 'A' Accredited by NAAC NURSING MANAGEMENT

Placement : Second Year

Hours of Instruction Theory:- 150 Hours Practical:- 150 Hours Total :- 300 Hours

Course Description

This course is designed to assist students to develop a broad understanding of Principles, concepts, trends and issues related to nursing management. Further, it would provide opportunity to students to understand, appreciate and acquire skills in planning, supervision and management of nursing services at different levels to provide quality nursing services.

Objectives

At the end of the course, students will be able to:

- 1. Describe the philosophy and objectives of the health care institutions at various levels.
- 2. Identify trends and issues in nursing
- 3. Discuss the public administration, health care administration vis a vis nursing administration
- 4. Describe the principles of administration applied to nursing
- 5. Explain the organization of health and nursing services at the various levels/institutions.
- 6. Collaborate and co-ordinate with various agencies by using multi-sectoral approach
- 7. Discuss the planning, supervision and management of nursing workforce for various health care settings.
- 8. Discuss various collaborative models between nursing education and nursing service to improve the quality of nursing care
- 9. Identify and analyse legal and ethical issues in nursing administration
- 10. Describe the process of quality assurance in nursing services.
- 11. Demonstrate leadership in nursing at various levels

(Deemed to be University) Grade 'A' Accredited by NAAC

PRACTICALS

Sr. No.	Dept./Unit	Total Hours	
	Hospital administration –Account section, CSSD, Dietary		
1	Dept, Waste treatment Unit, Central Store	20	Hours
	Nursing service administration – Officer of nursing		
2	superintendent, Department in Charge	50	Hours
	Nursing school administration office of Principal of		
3	School/College of Nursing	20	Hours
4	Visits	60	Hours
	Total	150 Hours	

(Deemed to be University) Grade 'A' Accredited by NAAC

ACTIVITES :-

- 1. Prepare prototype personal files for staff nurses, faculty and cumulative records
- 2. Preparation of budget estimate, Revised estimate and performance budget
- 3. Plan and conduct staff development programme
- 4. Preparation of Organization Chart
- 5. Developing nursing standards/protocols for various units
- 6. Design a layout plan for speciality units /hospital, community and educational institutions
- 7. Preparation of job description of various categories of nursing personnel
- 8. Prepare a list of equipments and supplies for speciality units
- 9. Assess and prepare staffing requirement for hospitals, community and educational institutions
- 10. Plan of action for recruitment process
- 11. Prepare a vision and mission statement for hospital, community and educational institutions
- 12. Prepare a plan of action for performance appraisal
- 13. Identify the problems of the speciality units and develop plan of action by using problem solving approach
- 14. Plan a duty roster for speciality units/hospital, community and educational institutions
- 15. Prepare: anecdotes, incident reports, day and night reports, handing and taking over reports, enquiry reports, nurses notes, Official letters, curriculum vitae, presentations etc
- 16. Prepare a plan for disaster management
- 17. Group work
- 18. Field appraisal report
- 19. Supervision of subordinates / Students
- 20. Clinical teaching for staff and students
- 21. Assist for condemnation procedures
- 22. Preparation of advertisement

ASSIGNMENT

- Seminar
- Module Preparation (staff development programme)
- Job Description for various category of staff
- Cumulative reword
- Evaluation Performa
- Personal Appraisal for various category of staff
- Recruitment process
- Observational Study Report Preparation
- Head quarters of administrative offers Reputed hospitals, Nursing council
- Any Industry
- WHO Office
- Health & Family Welfare Bureau

(Deemed to be University) Grade 'A' Accredited by NAAC

METHODS OF TEACHING

- Lecture cum discussion
- Demonstration
- Seminar
- Debate
- Exposure to Scientific Conference
- Field Visits

METHODS OF EVALUATION

- Tests
- Presentation

SECOND YEAR M.Sc. NURSING

CLINICAL SPECIALITY - II

MEDICAL SURGICAL NURSING - CRITICAL CARE NURSING

Placement: Second Year

Hours of instruction

Theory:- 150 hours Practical:- 950 hours Total :- 1100 hours

Course Description

This course is designed to assist students in developing expertise and in-depth knowledge in the field of Critical Care Nursing. It will help students to develop advanced skills for nursing intervention in caring for critically ill patients. It will enable the student to function as critical care nurse practitioner/ specialist. It will further enable the student to function as educator, manager and researcher in the field of Critical Care Nursing.

Objectives

At the end of the course the students will be able to

- 1. Appreciate trends and issues related to Critical Care Nursing.
- 2. Describe the epidemiology, etiology, pathophysiology and diagnostic assessment of critically ill patients
- 3. Describe the various drugs used in critical care and nurses responsibility
- 4. Perform physical, psychosocial & spiritual assessment
- 5. Demonstrate advance skills/competence in managing critically ill patients including Advance Cardiac Life Support.
- 6. Demonstrate skill in handling various equipments/gadgets used for critical care
- 7. Provide comprehensive care to critically ill patients.
- 8. Appreciate team work & coordinate activities related to patient care.
- 9. Practice infection control measures.
- 10. Assess and manage pain.
- 11. Identify complications & take appropriate measures.
- 12. Discuss the legal and ethical issues in critical care nursing
- 13. Assist patients and their family to cope with emotional distress, spiritual, grief and anxiety
- 14. Assist in various diagnostic, therapeutic and surgical procedures
- 15. Incorporate evidence based nursing practice and identify the areas of research in the field of critical care nursing
- 16. Identify the sources of stress and manage burnout syndrome among health care providers.
- 17. Teach and supervise nurses and allied health workers.
- 18. Design a layout of ICU and develop standards for critical care nursing practice.

(Deemed to be University) Grade 'A' Accredited by NAAC

COURSE CONTENT

UNIT	HOURS	Course Content		
Ι	5	Introduction to Critical Care Nursing		
		 Historical review- Progressive patient care (PPC) Review of anatomy and physiology of vital organs, fluid and electrolyte balance Concepts of critical care nursing Principles of critical care nursing Scope of critical care nursing Critical care unit set up including equipments supplies, use and care of various type of monitors & ventilators 		
	10	• Flow sheets		
II	10	Concept of Holistic care applied to critical care nursing		
		 practice Impact of critical care environment on patients:- Risk factors, Assessment of patients, Critical care psychosis, prevention & nursing care for patients affected with psycho physiological & psychosocial problems of critical care unit, Caring for the patient's family, family teaching The dynamics of healing in critical care unit:-therapeutic touch, Relaxation, Music therapy, Guided Imagery, acupressure Stress and burnout syndrome among health team members 		
III	14	Review		
		 Pharmacokinetics Analgesics/Anti inflammatory agents Antibiotics, antiseptics Drug reaction & toxicity Drugs used in critical care unit (inclusive of Inotropic, life saving drugs) Drugs used in various body systems IV fluids and electrolytes Blood and blood components Principles of drug administration, role of nurses and care of drugs 		
IV	5	Pain Management		
		 Pain & Sedation in Critically ill patients Theories of pain, Types of pain, Pain assessment, Systemic responses to pain Pain management-pharmacological and non- pharmacological measures Placebo effect 		
V	5	Infection control in intensive care unit		
	-	 Nosocomial infection in intensive care unit; methyl resistant staphylococcus aureus (MRSA), 		

(Deemed to be University)

		Disinfection, Sterilization, Standard safety measures, Prophylaxis for staff	
VI	10	Gastrointestinal System	
		 Causes, Pathophysiology, diagnosis, Prognosis, Management: Medical, Surgical and Nursing management of:-Acute Gastrointestinal Bleeding, Abdominal injury, Hepatic Disorders:-Fulminent hepatic failure, Hepatic encephalopathy, Acute Pancreatitis, Acute intestinal obstruction, Perforative peritonitis 	
VII	10	Renal System	
		 Causes, pathophysiology, Clinical types, Clinical features, diagnosis, Prognosis, Management: Medical, Surgical and Nursing management of:-Acute Renal Failure, Chronic Renal Failure, Acute tubular necrosis, Bladder trauma Management Modalities: Hemodialysis, Continuous Ambulatory Peritoneal Dialysis, Continuous arterio venus hemodialysis, Renal Transplant, 	
VIII	10	Nervous System	
		 Causes, pathophysiology, Clinical types, Clinical features, diagnosis, Prognosis, Management: Medical, Surgical and Nursing management of:-Common Neurological Disorders:- Cerebrovascular disease, Cerebrovascular, Guillein Barre-Syndrome, Myasthenia Gravis, Coma, Persistent vegetative state, Encephalopathy, Head injury, Spinal Cord injury Management Modalities: Assessment of Intracranial pressure, Management of intracranial hypertension, Craniotomy Problems associated with neurological disorders: regulation, Unconsciousness, Herniation syndrome 	
IX	10	Endocrine System	
		 Causes, Pathophysiology, Clinical types, Clinical features, diagnosis, Prognosis, Management: Medical, Surgical and Nursing Management of :-Hypoglycemia, Diabetic Ketoacidosis, Thyroid crisis, Myxoedema, Adrenal crisis, Syndrome of Inappropriate/ hypersecretion of Antidiuretic Hormone (SIADH) 	
X	15	Management of other Emergency Conditions	
		Mechanism of injury, Thoracic injuries, Abdominal injuries, pelvic fractures, complications of trauma, Head injuries Shock: Shock syndrome, Hypovolemic, Cardiogenic, Anaphylactic, Neurogenic and Septic shock Systemic inflammatory Response: The inflammatory response, Multiple organ dysfunction syndrome	

(Deemed to be University)

Grade 'A' Accredited by NAAC			
XI	15	 Disseminated Intravascular Coagulation Drug Overdose and Poisoning, Acquired Immunodeficiency Syndrome (AIDS) Ophthalmic: Eye injuries, Glaucoma, retinal detachment Ear Nose Throat: Foreign bodies, stridor, bleeding, Quincy, acute allergic conditions Psychiatric emergencies;, suicide, crisis intervention Cardiovascular emergencies Principles of Nursing in caring for patients with 	
		 Cardiovascular disorders Assessment: Cardiovascular system: Heart sounds, Diagnostic studies:- Cardiac enzymes studies, Electrocardiographic monitoring, Holter monitoring, Stress test. Echo cardiography, Coronary angiography, Nuclear medicine studies Causes, Pathophysiology, Clinical types, Clinical features, Diagnostic Prognosis, Management : Medical, Surgical & Nursing management of:-Hypertensive crisis, Coronary artery disease, Acute Myocardial infarction, Cardiomyopathy, Deep vein thrombosis, Valvular diseases, Heart block, Cardiac arrhythmias & conduction disturbances, Aneurysms, Endocarditis, Heart failure Cardio pulmonary resuscitation BCLS/ ACLS Management Modalities: Thrombolytic therapy, Pacemaker – temporary & permanent, Percutaneous transluminal coronary angioplasty, Cardioversion, Intra Aortic Balloon pump monitoring, Defibrillations, Cardiac surgeries, Coronary Artery Bypass Grafts(CABG/MICAS), Valvular surgeries, Heart Transplantat ion, Autologous blood transfusion, Radiofrequency Catheter Ablation Caring precautions for Covid – 19 patients in mechanical 	
XII	15	Ventilators Respiratory System	
		 Acid-base balance & imbalance Assessment : History & Physical Examination Diagnostic Tests: Pulse Oximetry, End –Tidal Carbon Dioxide Monitoring, Arterial blood gas studies, chest radiography, pulmonary Angiography, Bronchoscopy, Pulmonary function Test, Ventilation perfusion scan, Lung ventilation scan Causes Pathophysiology, Clinical types, Clinical features, Prognosis, Management: Medical, Surgical and Nursing management of Common pulmonary disorders:- Pneumonia, Status asthmaticus, interstitial drug disease, Pleural effusion, Chronic obstructive pulmonary disease, 	

(Deemed to be University)

	U	Grade 'A' Accredited by NAAC
		 Pulmonary tuberculosis, Pulmonary edema, Atelactasis, Pulmonary embolism, Acute respiratory failure, Acute respiratory distress syndrome (ARDS), Chest Trauma Haemothorax, Pneumothorax Management Modalities:-Airway Management Ventilatory Management:-Invasive, non- invasive, long term mechanical ventilations Bronchial Hygiene:-Nebulization, deep breathing exercise, chest physiotherapy, postural drainage, Inter Costal Drainage, Thoracic surgeries Management of severe Covid-19 infection.
XIII	7	Burns
	,	 Clinical types, classification, pathophysiology, clinical features, assessment, diagnosis, prognosis, Management: Medical, Surgical & Nursing management of burns Fluid and electrolyte therapy – calculation of fluids and its administration
		 Pain management Wound care Infection control Prevention and management of burn complications
XIV	5	Grafts and flapsReconstructive surgeryRehabilitation
	5	 Obstetrical Emergencies Causes, Pathophysiology, Clinical types, clinical features, diagnostic Prognosis, Management: Medical, Surgical and Nursing management of :Antepartum haemorrhage, Preeclampsia, eclampsia, Obstructed labour and ruptured uterus, Post partum haemorrhage, Peurperal sepsis, Obstetrical shock
XV	10	Neonatal Paediatric emergencies
		 Causes, pathophysiology, Clinical types, Clinical features, diagnostic, Prognosis, Management: medical, surgical and Nursing management of Neonatal emergencies Asphyxia Neonatarum, Pathological Jaundice in Neonates, Neonatal seizures, Metabolic disorders, Intra cranial Hemorrhage, Neonatal Sepsis, RDS/HMD (Respiratory Distress Syndrome/Hyaline Membrane Disease), Congenital disorders:- Cyanotic heart disease, tracheo oesophageal fistula, hypertropic pyloric stenosis, imperforate anus Pediatric emergencies
		Dehydration,Acute broncho pneumonia,

(Deemed to be University)

Grade 'A' Accredited by NAAC

XVI	2	 Acute respiratory distress syndrome, Poisoning, Foreign bodies, Seizures, Traumas, Status asthmaticus Legal and ethical issues in critical care-Nurse's role	
	2	 Brain death Organ donation & Counseling Do Not Resuscitate(DNR) Euthanasia 	
ХVІІ	2	 Living will Quality assurance Standards, Protocols, Policies, Procedures Infection control; Standard safety measures Nursing audit Staffing Design of ICU/CCU 	

Practical

Department./Unit	Total Hours	Activity / Assignment
Burns ICU	60 Hours	Nursing Care Plan – 1 & report
Medical ICU	120 Hours	Nursing Care Plan – 1 & report Case presentation -1
Surgical ICU	120 Hours	Nursing Care Plan – 1 & report Case presentation -1 Report
CCU	60 Hours	Nursing Care Plan – 1 & report

Cardio Thoracic Ward	60 Hours	Nursing Care Plan – 1 & report
Neuro / Neurosurgical ICU	120 Hours	Nursing Care Plan (Medical-1, Surgical -1) Report
Operating System	60 Hours	Report
Total	960 Hours	

(Deemed to be University) Grade 'A' Accredited by NAAC

ESSENTIAL CRITICAL CARE NURSING SKILLS

I. Procedures Observed

- 1. CT Scan
- 2. MRI
- 3. EEG
- 4. Hemodialysis
- 5. Endoscopic Retrograde cholangio Pancreaticogram(ERCP)
- 6. Heart/ Neuro/GI./ Renal Surgeries

II. Procedures Assisted

- 1. Advanced life support system
- 2. Basic cardiac life support
- 3. Arterial line/arterial pressure monitoring/blood taking
- 4. Arterial blood gas
- 5. ECG recording
- 6. Blood transfusion
- 7. IV cannulation therapy
- 8. Arterial Catheterization
- 9. Chest tube insertion
- 10. Endotracheal intubations
- 11. Ventilation
- 12. Insertion of Central line/CVP line
- 13. Connecting lines for dialysis

III. Procedure Performed

- 1. Airway management
 - a. Application of oropharyngeal airway
 - b. Oxygen therapy
 - c. CPAP (Continuous Positive Airway pressure)
 - d. Care of Tracheostomy
 - e. Endotracheal Extubation
- 2. Cardiopulmonary resuscitation, Basic cardiac life support, ECG
- 3. Monitoring of critically ill patients clinically with monitors, capillary refill time (CRT) assessment of jaundice, ECG.
- 4. Gastric lavage
- 5. Assessment of critically ill patients

Identification & assessment of risk factors, Glasgow coma scale, and dolls eye movement, arterial pressure monitoring, cardiac output/pulmonary artery pressure monitoring, and detection of life threatening abnormalities

6. Admission & discharge of critically ill patients

(Deemed to be University)

Grade 'A' Accredited by NAAC

- 7. Nutritional needs Gastrostomy feeds, pharyngeal feeds, Jejunostomy feeds, TPN, formula preparation & patient education.
- 8. Assessment of patient for alteration in blood sugar levels monitoring blood sugar levels periodically & administering insulin periodically.
- 9. Administration of drugs: IM, IV injection, IV cannulation & fixation of infusion pump, calculation of dosages, use of insulin syringes/ tuberculin, monitoring fluid therapy, blood administration.
- 10. Setting up dialysis machine and starting, monitoring and closing dialysis
- 11. Procedures for prevention of infections: Hand washing, disinfection & sterilization surveillance, and fumigation universal precautions.
- 12. Collection of specimen.
- 13. Setting, use & maintenance of basic equipment, ventilator, O2 analyzer, monitoring Equipment, transducers, defibrillator, infusion & syringe pumps, centrifuge machine.

IV Other Procedures:

Teaching Methods

- Lecture
- Group discussion
- Seminar
- Case Presentation
- Case Conferences
- Field Trips (Specialty Hospital)

Clinical Experience

- Case Assignment
- Physical Assessment
- NCP and implementation
- Participation in case conference
- Participation in diagnostic tests, inflection control procedures, etc

(Deemed to be University) Grade 'A' Accredited by NAAC

PROFORMA & GUIDELINES FOR CASE PRESENTATION

I Patent Biodata

Name, Age, Sex Religion, Marital status, Occupation, Source of health care, Date of admission, Provisional Diagnosis, Date of surgery if any.

II Presenting complaints

Describe the complaints with which the patient has been brought to the hospital

III Socio-economic status of the family: Monthly income, expenditure on health, food, education etc.

IV History of Illness (Medical & Surgical)

- i) History of present illness onset, symptoms, duration, precipitating/ aggravating factors
- ii) History of past illness surgery, allergies, medications etc.
- iii) Family history Family tree, history of illness in the family members, risk factors congenital problem, psychological problem etc.

V Diagnosis (Provisional & Confirmed)

Description of disease: Includes the followings

- 1. Definition
- 2. Etiology & risk factors
- 3. Patho physiology
- 4. Clinical features.

VI Physical Examination of Patient (Date & Time)

Physical examination: with date and time. Clinical features present in the book Present in the Patient

VII Investigations

OBSTETRIC AND GYNAECOLOGICAL NURSING

Placement - Second Year

Hours of Instruction

 Theory: 150 hrs

 Practical : 950 hrs

 Total: 1100 hrs

Course Description

This course is designed to assist the student in developing expertise and in-depth understanding in the field of Obstetric and gynecological Nursing .It will help the student to develop advanced nursing skills for nursing interventions in various obstetrical and gynecological conditions. It will further enable the students to function as midwifery nurse practitioner/ specialist, educator, manager and researcher in the field of obstetric and gynecological nursing.

Objectives

At the end of the course, the student will be able to:

- 1. Describe the epidemiology, etiology, pathophysiology and diagnostic assessment of women with obstetric and gynaecological conditions
- 2. Perform physical, psychosocial, cultural & spiritual assessment
- 3. Demonstrate competence in caring for women with obstetrical and gynaecological conditions
- 4. Demonstrate competence in caring for high risk newborn.
- 5. Identify and Manage obstetrical and neonatal emergencies as per protocol.
- 6. Practice infection control measures
- 7. Utilize recent technology and various diagnostic, therapeutic modalities in the management of obstetrical, gynecological and neonatal care.
- 8. Demonstrate skill in handling various equipments/gadgets used for obstetrical, gynaecological and neonatal care
- 9. Teach and supervise nurses and allied health workers.
- 10. Design a layout of speciality units of obstetrics and gynecology
- 11. Develop standards for obstetrical and gynaecological nursing practice.
- 12. Counsel women and families
- 13. Incorporate evidence based nursing practice and identify the areas of research in the field of obstetrical and gynaecological nursing
- 14. Function as independent midwifery nurse practitioner
- 15. Explain the national health prorammes in relation to obstetrical and gynaecological nursing

MGM INSTITUTE OF HEALTH SCIENCES, KAMOTHE, NAVI MUMBAI (Deemed to be University)

Grade 'A' Accredited by NAAC

CONTENTS OUTLINE

UNIT	HOURS	Course Content
Ι	25	Management of problems of women during pregnancy
		Risk approach of obstetrical nursing care, concept & goals.
		Screening of high-risk pregnancy, newer modalities of
		diagnosis.
		Nursing Management of Pregnancies at risk-due to obstetrical
		complication
		Pernicious Vomiting.
		 Bleeding in early pregnancy, abortion, ectopic
		pregnancy, and gestational trophoblostic diseases.
		 Hemorrhage during late pregnancy, ante partum
		hemorrhage, Placenta praevia, abruptio placenta.
		• Hypertensive disorders in pregnancy, pre-eclampsia,
		eclampsia, Heomolysis Elevated liver enzyme Low
		Platelet count (HELLP)
		• Iso-immune diseases. Rh and ABO incompatibility
		Hematological problems in pregnancy.
		Hydramnios-oligohydramnios
		• Prolonged pregnancy- post term, post maturity.
		Multiple pregnancies.
		• Intra uterine infection & pain during pregnancy.
		• Intra Uterine Growth Retardation(IUGR), Premature
TT	15	Rupture of Membrane(PROM), intra uterine death
II	15	Pregnancies at risk-due to pre-existing health problems
		Metabolic conditions.
		 Anemia and nutritional deficiencies
		 Hepatitis
		 Cardio-vascular disease.
		 Thyroid diseases.
		• Epilepsy.
		Essential hypertension
		Chronic renal failure.
		Tropical diseases.
		Psychiatric disorders
		Infections Toxoplasmosis Rubella Cytomegalo virus
		Herpes (TORCH); Reproductive Tract
		Infection(RTI);STD; HIV/AIDS, Vaginal infections;
		Leprosy, Tuberculosis
		• Other risk factors: Age- Adolescents, elderly; unwed
		mothers, sexual abuse, substance use
		• Pregnancies complicating with tumors, uterine
		anomalies, prolapse, ovarian cyst
	l

TTT	1	Abnormal labour and term labour & shototrical		
III	15	Abnormal labour, pre-term labour & obstetrical		
		emergencies Etiology, pathophysiology and nursing		
		management of		
		• Uncoordinated uterine actions, Atony of uterus, precipitate		
		labour, prolonged labour.		
		Abnormal lie, presentation, position compound		
		presentation		
		 Contracted pelvis-CPD; dystocia 		
		Obstetrical emergencies Obstetrical shock, vasa praevia,		
		inversion of uterus, amniotic fluid embolism, rupture		
		uterus, presentation and prolapse cord.		
		• Augmentation of labour. Medical and surgical induction.		
		• Version		
		• Manual removal of placenta.		
		• Obstetrical operation: Forceps delivery, Ventouse,		
		Caesarian section, Destructive operations		
		• Genital tract injuries-Third degree perineal tear, VVF,		
		RVF Complications of third stage of labour:		
		• Post partum Hemorrhage.		
		Retained placenta.		
IV	10	Post partum complications		
		• Nursing management of Puerperal infections, puerperal		
		sepsis, urinary complications, puerperal venous		
		thrombosis and pulmonary embolism		
		• Sub involution of uterus, Breast conditions,		
		Thrombophlebitis		
		 Psychological complications, post partum blues, 		
		depression, psychosis		

(Deemed to be University)

Grade 'A' Accredited by NAAC

Grade 'A' Accredited by NAAC			
V	25	High Risk Newborn	
		Concept, goals, assessment, principles.	
		 Nursing management of Pre-term, small for gestational age, post-mature infant, and baby of diabetic and substance use mothers. Respiratory conditions, Asphyxia neonatorum, neonatal apnoea meconium aspiration syndrome, pneumo thorax, pneumo mediastinum Icterus neonatorum. Birth injuries. Hypoxic ischaemic encephelopathy Congenital anomalies. Neonatal seizures. Neonatal hypocalcaemia, hypoglycemia, hypomagnesaemia. Neonatal infections, neonatal sepsis, opthalmia neonatorum, cogenital syphilis, HIV/AIDS Advanced neonatal procedures. Calculation of fluid requirements. Hematological conditions – erythroblastosis fetalis, hemorrhagic disorder in the newborn Organization of neonatal care, services(Levels), transport, neonatal infensive care unit, organization and management of nursing services in NICU 	
VI	15	HIV/AIDS	
	15	• HIV positive mother and her baby	
		Epidemiology Screening	
		• Parent to child transmission(PTCT)	
		Prophylaxis for mother and baby	
		Standard safety measuresCounseling	
		 Breast feeding issues 	
		 National policies and guidelines 	
		Issues: Legal,ethical, Psychosocial and rehabilitation	
		• Role of nurse	
L	1	1

Practical

		Total = 9 1 Week =		
Sr.No.	Dept./ Unit	No. of Week	Total	l Hours
1	Antenatal OPD including Infertility clinics/ Reproductive medicine, Family welfare and post partum clinic / PTCT	6	180	Hours
2	Antenatal and Postnatal ward	6	180	Hours
3	Labour room	4	120	Hours
4	Neonatal Intensive Care Unit	3	90	Hours
5	Obstetric/Gynae Operation Theatre	3	90	Hours
6	Gynae Ward	4	120	Hours
7	CHC, PHC, SC	6	180	Hours
	Total	32 Weeks	960	Hours

Essential Obstetrical And Gynecological Skills Procedure Observed

- Assisted Reproductive Technology procedures
- Ultra Sonography
- Specific laboratory tests.
- Amniocentesis.
- Cervical & vaginal cytology.
- Foetoscopy.
- Hysteroscopy.
- MRI.
- Surgical diathermy.
- Cryosurgery.

Procedures Assisted

- Operative delivery
- Abnormal deliveries-Forceps application, Ventouse, Breech
- Exchange blood transfusion
- Culdoscopy.
- Cystoscopy
- Tuboscopy
- Laparoscopy.
- Endometrial Biopsy
- Tubal patent test
- Chemotherapy
- Radiation therapy
- Medical Termination of Pregnancy
- Dilatation and Curettage

(Deemed to be University) Grade 'A' Accredited by NAAC

Procedures Performed

- History taking.
- Physical Examination-General
- Antenatal assessment. 20
- Pelvic examination
- Assessment of risk status.
- Assessment of Intra uterine foetal well-being.kick chart and foetal movement chart, Doppler assessment, Non Stress Test, Contraction stress test(Oxytocin challenge test)
- Universal precautions- Disposal of biomedical waste.
- Per Vaginal examination and interpretation (early pregnancy, labour, post partum).
- Utilization of Partograph
- Medical & Surgical induction(Artificial rupture of membranes).
- Vacuum extraction
- Conduct of delivery.
- Prescription and administration of fluids and electrolytes through intravenous route.
- Application of outlet forceps, delivery of breach Burns Marshall, Love set maneuver
- Repair of tears and Episiotomy suturing.
- Vacuum extraction
- controlled cord traction, Manual removal of placenta, placental examination,
- Manual vacuum aspiration
- Postnatal assessment.- 20
- Management of breast engorgement
- Thrombophlebitis (white leg)
- Postnatal counseling.
- Reposition of inversion of uterus.
- Laboratory tests: Blood- Hb, Sugar, Urine-albumin, sugar
- Breast care, breast exam, and drainage breast abscess.
- Postnatal exercise.
- Assessment –New born assessment; physical and neurological, Apgar score, high-risk newborn, Monitoring neonates; Clinically and With monitors, Capillary refill time, Assessment of jaundice, danger signs
- Anthropometric measurement
- Neonatal resuscitation
- Gastric Lavage
- Care of newborn in multi channel monitor and ventilator.
- Care of newborn in radiant warmer and incubator.
- Kangaroo mother care.
- Assisting mother with exclusive Breast-feeding
- Feeding technique: Katori, spoon, naso/orogastric, Total Parenteral nutrition
- Assessment, calculation and administration of fluids and medications:
 - Oral
 - I.D.
 - I.M.
 - I.V.- Securing IV line, infusion pump
 - Administration of drug per rectum
 - Capillary blood sample collection.
 - Oxygen therapy.

(Deemed to be University)

Grade 'A' Accredited by NAAC

- Phototherapy.
- Chest physiotherapy.
- counseling Parental, bereavement, family planning, infertility etc
- Setting of operation theatre.
- Trolley and table set up for Obstetrical & gynaecological operations.
 - Pap smear.
 - Vaginal smear.
 - Insertion of pessaries,
 - Insertion of IUD and removal.
 - Teaching skills
 - communication skills
 - Prepare referral slips
 - Pre transport stabilization
 - Networking with other stake holders

PROFORMA & GUIDELINES FOR CASE PRESENTATION

I Patent Biodata

Name, Age, Sex Religion, Marital status, Occupation, Source of health care, Date of admission, Provisional Diagnosis, Date of surgery if any.

II Presenting complaints

Describe the complaints with which the patient has been brought to the hospital

III Socio-economic status of the family:

Monthly income, expenditure on health, food, education etc.

IV History of Illness (Medical & Surgical)

- i) History of present illness onset, symptoms, duration, precipitating/ aggravating factors
- ii) History of past illness surgery, allergies, medications etc.
- iii) Family history Family tree, history of illness in the family members, risk factors congenital problem, psychological problem etc.

V Diagnosis (Provisional & Confirmed)

Description of disease: Includes the followings

- 1. Definition
- 2. Etiology & risk factors
- 3. Patho physiology
- 4. Clinical features.

VI Physical Examination of Patient (Date & Time)

Physical examination: with date and time.

Clinical features present in the book Present in the Patient

VII Investigations

Date	Investigation done	Results	Normal Value	Interfaces

VIII Management – (Medical / Surgical)

Aims of management

Medical or Surgical Management

Pharmacological Management

Theory:- 150 hours Practical :-950 hours Total :- 1100 hours

Course Description

This course is designed to assist students in developing expertise and in-depth understanding in the field of Pediatric Nursing. It will help students to develop advanced skills for nursing intervention in various pediatric medical and surgical conditions. It will enable the student to function as pediatric nurse practitioner/specialist. It will further enable the student to function as educator, manager, and researcher in the field of Paediatric nursing

Objectives

At the end of the course the students will be able to:

- 1. Apply the nursing process in the care of ill infants to pre adolescents in hospital and community
- 2. Demonstrate advanced skills/competence in nursing management of children with medical and surgical problems
- 3. Recognize and manage emergencies in children
- 4. Provide nursing care to critically ill children
- 5. Utilize the recent technology and various treatment modalities in the management of high risk children
- 6. Prepare a design for layout and describe standards for management of pediatric units/hospitals
- 7. Identify areas of research in the field of pediatric nursing

Grade 'A' Accredited by NAAC

COURSE CONTENT

UNIT	HOURS	Course Content
Ι	5	Introduction
		Current principles, practices and trends in Pediatric Nursing
		Role of pediatric nurse in various settings -Expanded and
		extended
II	35	Pathophysiology, assessment(including interpretation of various
		invasive and non-invasive diagnostic procedures),
		treatment modalities and nursing intervention in selected pediatric
		medical disorders
		Child with respiratory disorders:
		- Upper respiratory tract: choanal atresia, tonsillitis, epistaxis,
		aspiration.
		- Lower respiratory tract: Broncheolitis, Bronchopneumonia,
		Asthma, cystic fibrosis
		Child with gastro-intestinal disorders:
		- Diarrheal diseases, gastro-esophageal reflux.
		- Hepatic disorders: Hepatitis, Indian childhood cirrhosis,
		liver transplantation.
		- Malabsorption syndrome, Malnutrition
		• Child with renal/ urinary tract disorders: Nephrotic syndrome,
		Nephritis, Hydronephrosis, hemolytic-uremic syndrome,
		kidney transplantation
		Child with cardio-vascular disorders:
		- Acquired: Rheumatic fever, Rheumatic heart disease,
		- Congenital: Cynotic and acynotic
		Child with endocrine/metabolic disorders: Diabetes
		insipidus, Diabetes Mellitus – IDDM, NIDDM, hyper and
		hypo thyroidism, phenylketonuria, galactosemia
		Child with Neurological disorders: Convulsions, Meningitis,
		encephalitis, guillian- Barre syndrome
		• Child with oncological disorders: Leukemias, Lymphomas,
		Wilms' tumor, nephroblastomas, neuroblastomas,
		Rhabdomyosarcoma, retinoblastoma, hepatoblastoma, bone
		tumors
		• Child with blood disorders: Anemias, thalassemias,
		hemophilia, polycythemia, thrombocytopenia, and
		disseminated intravascular coagulation
		Child with skin disorders
		Common Eye and ENT disorders
		Common Communicable diseases

	0140	
III	35	 Assessment(including interpretation of various invasive and non-invasive diagnostic procedures), treatment modalities including cosmetic surgery and nursing interventions in selected pediatric surgical problems/ Disorders Gastrointestinal system: Cleft lip, cleft palate and conditions requiring plastic surgery, Tracheo esophageal fistula/atresia, Hirschsprungs' disease/megacolon, gastrochisis, exomphalus, anorectal malformation, omphalocele, diaphragmatic hernia Anomalies of the nervous system: Spina bifida, Meningocele, Myelomeningocele, hydrocephalus Anomalies of the genito-urinary system: Hypospadias, Epispadias, Undescended testes, Exstrophy bladder Anomalies of the skeletal system Eye and ENT disorders Nursing management of the child with traumatic injuries: General principles of managing Pediatric trauma, Head injury, abdominal injury, poisoning, foreign body obstruction, burns & Bites Child with oncological disorders: Solid tumors of childhood, Nephroblastoma, Neuro blastoma, Hodgkin's/Non Hodgkin's Lymphoma, Hepatoblastoma, Rhabdomyosarcoma Management of stomas, catheters and tubes
		Management of wounds and drainages
IV	10	Intensive care for pediatric clients
		 Resuscitation, stabilization & monitoring of pediatric patients Anatomical & physiological basis of critical illness in infancy and childhood Care of child requiring long-term ventilation Nutritional needs of critically ill child Legal and ethical issues in pediatric intensive care Intensive care procedures, equipment and techniques Documentation
V	20	High Risk Newborn
		 Concept, goals, assessment, principles. Nursing management of Post-mature infant, and baby of diabetic and substance use mothers. Respiratory conditions, Asphyxia neonatorum, neonatal apnoea meconium aspiration syndrome, pneumo thorax, pneumo mediastinum Icterus neonatorum. Birth injuries. Hypoxic ischaemic encephalopathy Congenital anomalies. Neonatal seizures. Neonatal hypocalcaemia, hypoglycemia, hypomagnesaemia.

	Grade 'A' Accredited by NAAC			
VI	10	 Neonatal heart diseases. Neonatal hemolytic diseases neonatorum, cogenital syphilis, HIV/AIDS Advanced neonatal procedures. Calculation of fluid requirements. Hematological conditions – erythroblastosis fetalis, hemorrhagic disorder in the newborn Organization of neonatal care, services(Levels), transport, neonatal intensive care unit, organization and management of nursing services in NICU 		
V I	10	Developmental disturbances and implications for nursing		
		 Adjustment reaction to school, Learning disabilities Habit disorders, speech disorders, Conduct disorders, Early infantile autism, Attention deficit hyperactive disorders (ADHD), depression and childhood schizophrenia. 		
VII	10	Challenged child and implications for nursing		
VIII	5	 Physically challenged, causes, features, early detection & management Cerebral palsied child, Mentally challenged child. Training & rehabilitation of challenged children Crisis and nursing intervention The hospitalized child, Terminal illness & death during childhood 		
		Nursing intervention-counseling		
IX	5	Drugs used in PediatricsCriteria for dose calculationAdministration of drugs, oxygen and bloodDrug interactionsAdverse effects and their management		
X	10	 Administration and management of pediatric care unit Design & layout Staffing, Equipment, supplies, Norms, policies and protocols Practice standards for pediatric care unit Documentation 		
XI	5	Education and training in Pediatric care		
		 Staff orientation, training and development, In-service education program, Clinical teaching programs. 		

(Deemed to be University) Grade 'A' Accredited by NAAC

Practical

Total = 960 Hours 1 Week = 30 Hours

S. No.	Deptt./ Unit	No. of Week	Total Hours
1	Pediatric medicine ICU	4	120 Hours
2	Pediatric surgical ICU	4	120 Hours
3	NICU	4	120 Hours
4	Pediatric OT	2	60 Hours
5	Pediatric medicine ward	6	180 Hours
6	Pediatric surgery ward	6	180 Hours
7	Emergency/Casualty	4	120 Hours
8	Field visits*	2	60 Hours
	Total	32	960 Hours

*Child care center, Anganwadi, play school, Special schools for challenged children, Juvenile court, UNICEF, Orphanage, Creche, SOS village

Essential

I. Procedures Observed:

- Echo cardiogram
- Ultrasound head
- ROP screening (Retinopathy of prematurity)
- Any other
- **II. Procedures Assisted**
 - Advanced neonatal life support
 - Lumbar Puncture
 - Arterial Blood Gas
 - ECG Recording
 - Umbilical catheterization arterial and venous
 - Arterial B P monitoring
 - Blood transfusion- exchange transfusion full and partial
 - IV cannulation & therapy
 - Arterial catheterization
 - Chest tube insertion
 - Endotracheal intubation
 - Ventilation
 - Insertion of long line
 - Assist in surgery

(Deemed to be University)

III. Procedures Performed:

- Airway Management
- Application of Oro Pharyngeal Airway
- Oxygen therapy
- CPAP(Continuous Positive Airway Pressure)
- Care of Tracheostomy
- Endotracheal Intubation
- Neonatal Resuscitation
- Monitoring of Neonates clinically & with monitors, CRT(Capillary Refill Time), assessment of jaundice, ECG
- Gastric Lavage
- Setting of Ventilators
- Phototherapy
- Assessment of Neonates: Identification & assessment of risk factors, APGAR Score, gestation age, Anthropometric assessment, Weighing the baby, Newborn examination, detection of life threatening congenital abnormalities,
- Admission & discharge of neonates
- Feeding management of breast feeding, artificial feeding, expression of breast milk, OG (Orogastric) tube insertion, gavage feeding, TPN, Breast feeding counseling
- Thermoregulation- Axillary temperature, Kangaroo Mother Care (KMC), Use of Radiant warmer, incubators, management of thermoregulation & control
- Administration of Drugs: I/M, IV injection, IV Cannulation & fixation infusion pump, Calculation of dosages, Neonatal formulation of drugs, use of tuberculin/ insulin syringes, Monitoring fluid therapy, Blood administration.
- Procedures for prevention of infections: Hand washing, disinfections & sterilization, surveillance, fumigation
- Collection of specimens
- Setting, Use & maintenance of basic equipment: Ventilator, O2 analyzer, monitoring equipment, Photo therapy unit, Flux meter, Infusion pump, Radiant warmer, incubator, Centrifuge machine, Bilimeter, Refractometer, laminar flow

PERFORMA & GUIDELINES FOR CASE STUDY

I] Patient's Biodata

Name, Age, Sex, Religion, Marital Status, Occupation, Source of Health Care, Date of Admission,

Provisional Diagnosis, Date of Surgery if any.

II] Presenting complaints

Describe the complaints with which the child has been admitted to the ward.

III] Child's Personal data:

- Obstetrical history of mother
- Prenatal & natal history
- Growth & Development (Compare with normal)
- Immunization status
- Dietary pattern including weaning
- Nutritional status
- Play habits
- Toilet training habits
- Sleep pattern
- Schooling

IV]Socio-economic status of family:

Monthly income, expenditure on health, food education

V] History of Illness

- 1. History of present illness onset, symptoms, during, precipitating/ aggregating factors
- 2. History of past illness Illness, hospitalizations, surgeries allergies.
- 3. Family History Family tree, family history of illness, risk factors, congenital problem, psychological
 - a. problem.

VI]Diagnosis:- Provisional & confirm.

VII] Description of disease: Included the following:

- 1. Definition
- 2. Related anatomy and physiology
- 3. Etiology & risk factor
- 4. Path physiology
- 5. Clinical features

VIII] Physical Examination of patient

Clinical features present in the book present in the patient

IX]Investigations:-

Date Investigation done Result Normal value Inference

CLINICAL SPECIALITY – II COMMUNITY HEALTH NURSING

Placement : Second Year

Hours of Instruction Theory- 150 hours Practical- 950 hours Total- 1100 hrs

Course Description

This course is designed to assist students in developing expertise and in-depth understanding in the field of community health nursing. It will help students to develop advanced skills for nursing intervention in various aspects of community health care settings. It will enable the student to function as community health Nurse practitioner/specialist. It will further enable the student to function as educator, manager and researcher in the field of community health nursing.

Objectives

At the end of the course the students will be able to:

- 1. Appreciate trends and issues related to community health Nursing-reproductive and child health, school health, Occupational health, international health, rehabilitation, geriatric and mental health.
- 2. Apply epidemiological concepts and principles in community health nursing practice
- 3. Perform community health assessment and plan health programmes
- 4. Describe the various components of Reproductive and child health programme.
- 5. Demonstrate leadership abilities in organizing community health nursing services by using inter-sectoral approach.
- 6. Describe the role and responsibilities of community health nurse in various national health and family welfare programmes
- 7. Participate in the implementation of various national health and family welfare programme
- 8. Demonstrate competencies in providing family centered nursing care independently
- 9. Participate/Conduct research for new insights and innovative solutions to health problems
- 10. Teach and supervise nurses and allied health workers.
- 11. Design a layout of sub center/Primary health center/Community health centre and develop standards for community health nursing practice.

Categorization of practical activities

Observed

- MCH office and DPHNO
- CHC/ First Referral Unit(FRU)
- Child guidance clinic
- Institute/Unit for mentally challenged
- District TB centre
- AIDS control society
- Filariasis clinic
- RCH clinic
- STD clinic
- Leprosy clinic
- Community based rehabilitation unit
- Cancer centers
- Palliative care
- Home of old age
- Mental health units
- De-addication centres
- School health services
- Industry
- Selected industrial health centers
- ESI unit
- Municipality/ corporation office

(Deemed to be University) Grade 'A' Accredited by NAAC

Assisted

- Laparoscopic sterilization
- Vasectomy
- All clinics related to RCH Monitoring of national health and family welfare programmes

Performed

- Conduct various clinics
- School health assessment.
- Health survey.
- Health assessment
- Drug administration as per the protocols
- Treatment of minor ailments
- Investigating outbreak of epidemic.
- Screening for leprosy, TB and non-communicable disease
- Presumptive and radical treatment for Malaria.
- Counseling
- Report writing
- Referrals
- Writing a project proposal
- Material management- requisition for indent, condemnation, inventory maintenance,
- Training and Supervision of various categories of personnel
- Liaison with NGO's

(Deemed to be University) Grade 'A' Accredited by NAAC

Placement: Second Year

Hours of Instruction Theory:- 150 hrs Practical:- 950 hrs Total :- 1100 Hours

Course Description

This course is designed to assist students in developing expertise and in-depth understanding in the field of Psychiatric Nursing. It will help students to develop advanced skills for nursing intervention in various psychiatric conditions. It will enable the student to function as psychiatric nurse practitioner/specialist. It will further enable the student to function as educator, manager, and researcher in the field of Psychiatric nursing

Objectives

At the end of the course the students will be able to:

- 1. Apply the nursing process in the care of patients with mental disorders in hospital and community
- 2. Demonstrate advanced skills/competence in nursing management of patients with mental disorders
- 3. Identify and care for special groups like children, adolescents, women, elderly, abused and neglected, people living with HIV/AIDS.
- 4. Identify and manage psychiatric emergencies.
- 5. Provide nursing care to critically ill patients with mental disorders
- 6. Utilize the recent technology and various treatment modalities in the management of patients with mental disorders
- 7. Demonstrate skills in carrying out crisis intervention.
- 8. Appreciate the legal and ethical issues pertaining to psychiatric nursing.
- 9. Identify areas of research in the field of psychiatric nursing.
- 10. Prepare a design for layout and describe standards for management of Psychiatric units/emergency units/hospitals
- 11. Teach psychiatric nursing to undergraduate students & in-service nurses.
- 12. Explain the national health programmes in relation to mental health nursing.

MGM INSTITUTE OF HEALTH SCIENCES, KAMOTHE, NAVI MUMBAI (Deemed to be University)

Grade 'A' Accredited by NAAC

Practical

Total = 960 Hours
1 Week = 30 Hours

				1 week = 50 mouts
		No. of		Assignment/ Activity
Sr.No.	Area of Posting	Week	Total Hours	
1	Acute Psychiatric Ward	4	120	Care Plan, Case presentation
2	Chronic Psychiatric Ward	4	120	Care Plan, Case presentation
3	De-addiction Unit	4	120	Group therapy & Behaviour Therapy I
4	Psychiatric Emergency Unit	4	120	
5	O.P.D (Neuro and psychiatric)	3	90 Hours	MSE
	Child Psychiatric Unit and child			Report
6	guidance clinic	2	60 Hours	
7	Post natal ward	1	30 Hours	Report
8	Family Psychiatric Unit	2	60 Hours	Family Therapy -I
9	Field visits – NIMHANS	2	60 Hours	Report
10	Rehabilitation	2	60 Hours	Report
11	Community Mental Health Unit	4	120 Hours	Mental Health Awareness Camp
	Total	32 Weeks	960 Hours	

Essential Psychiatric nursing skills

Procedures Observed

- 1. Psychometric tests
- Personality tests 2.
- Family therapy 3.
- 4. Assisted
- CT 5.
- MRI 6.
- Behavioral therapy. 7.

(Deemed to be University) Grade 'A' Accredited by NAAC

Procedures Performed

- 1. Mental status examination
- 2. Participating in various therapies Physical; ECT,
- 3. Administration of Oral, IM, IV psychotropic drugs
- 4. Interviewing skills
- 5. Counseling skills
- 6. Communication skills
- 7. Psycho education
- 8. Interpersonal relationship skills
- 9. Community Survey for identifying mental health problems
- 10. Rehabilitation therapy
- 11. Health education and life skills training.
- 12. Supportive psychotherapy skills
- 13. Group therapy
- 14. Milieu therapy
- 15. Social/Recreational therapy.
- 16. Occupational therapy.

FORMAT FOR DRUG BOOK

Sr. No.	Trade name & Pharmacological name	Indications	Dose & Route	Side effects / adverse drug response	Nursing implications	Indication in patient if applicable

(Deemed to be University) Grade 'A' Accredited by NAAC SECOND YEAR M.Sc. NURSING

CLINICAL SPECIALITY – II MENTAL HEALTH NURSING

PSYCHIATRIC NURSING HISTORY COLLECTIVE FORMAT

I Demographic data:

- Name
- Age
- Sex
- Marital Status
- Religion
- Occupation
- Socio-economic status
- Address
- Informant
- Information (Relevant or not) adequate or not

II Chief Complaints / Presenting complaints (List with duration)

- In patients own words and in informants own words.
 E.g.:- Sleeplessness x 3 weeks
- Loss of appetite & hearing voices x 2 weeks
- Talking to self

III Present psychiatric history/nature of the current episode

- Onset Acute (Within a few hours)
- Sub acute (Within a few days)
- Gradual (Within a few weeks)
- Duration Days, weeks or months
- Course Continuous/ episodic
- Intensity/ same / increasing or decreasing
- Precipitating factors Yes / No (If yes explain)
- History of current episode (explain in details regarding the presenting complaints)
- Associated disturbances included present medical problems (E.G. Disturbance in sleep, appetite, IPR & Social functioning, occupation etc).

IV Past Psychiatric history:

- Number of episode with onset and course
- Complete or incomplete remission
- Duration of each episode
- Treatment details and its side effects if any
- Details if any precipitating factors if present

(Deemed to be University) Grade 'A' Accredited by NAAC

V a) Past Medical History

- b) Past Surgical History
- c) Obstetrical History (Female)

VI Family History :-

 Family Genogram – 5 Generations include only grandparents. But if there is a family history

Include the particular generation

VII Personal History:-

- Pre-nantal history Maternal infections
- Exposure to radiation etc.
- Check ups
- Any complications
- Natal history Type of delivery
- Any complications
- Breath and cried at birth
- Neonatal infections
- Mile stones : Normal or delayed Behaviour during childhood
- Excessive temper tantrums
- Feeding habit
- Neurotic symptoms
- Pica
- Habit disorders
- Execratory disorders etc.
- Illness during childhood
 - Look specifically for CNS infections
 - Epilepsy
 - Neurotic disorders
 - Malnutrition

Schooling

- Age of going school
- Performance in the school
- Relationship with peers
- Relationship with teachers (Specifically look for learning disability and attention deficit)
- Look for conduct disorders E.G. Truancy, Stealing

VIII Occupational history

- Age of Joining job

(Deemed to be University)

Grade 'A' Accredited by NAAC

- Relationship with superiors, subordinates & colleagues
- Any Change in the job if any give details
- Reasons for changing jobs
- Frequent absenteeism

IX Sexual history

- Age of attaining puberty (female menstrual cycles are regular)
- Source and extent of knowledge about sex, any exposures
- Marital Status: with genogram.

X Pre morbid personality: (Personality of a patient consists of those habitual attitudes and patterns of

behaivior which characterize an individual. Personality sometimes changes after the onset of an illness.

Get a description of the personality before the onset of the illness. Aim to build up a picture of the individual, not type, enquiry with respect to the following areas.)

- **1. Attitude to others in social and sexual relationship:-** Ability to trust other, mark and sustain Relationship, anxious or secure, leader to follower, Participation, responsibility, capacity to make decision, dominant or submissive, friendly or emotionally cold, etc. Difficulty in role taking –gender, sexual, familial.
- **2. Aptitudes to self:-** Egocentric, Selfish, indulgent, dramatizing, critical, depreciatory, over concerned, self conscious, satisfaction or dissatisfaction with work. Attitudes towards Health and bodily functions. Attitude to past achievements and failure, and to the future.
- **3.Moral and religious attitude and standards:-** Evidence of rigidly or compliance, permissiveness or over conscientiousness, conformity, or rebellion. Enquiry specifically about religious beliefs. Excessive religiosity.
- **4.Mood:-** Enquiry about stability of mood, mood swings, whether anxious, irritable, worrying or tense. Whether lively or gloomy. Ability to express and control feelings of anger, anxiety, or depression.
- **5.Leisure activites and hobbies:-** Interest in reading, play, music, movies etc. Enquiry about creative ability. Whether leisure time is spend alone or with friends. Is the circle of friends large or small?
- **6.Fanstacy Life:-** Enquire about content of day dreams and dreams. Amount of time spent in day dreaming.
- **7.Reaction pattern to stress:-** Ability to tolerate frustrations, losses, disappointments, and circumstance arousing anger, anxiety or depression. Evidence for the excessive use of particular defense mechanisms such as denial, rationalization, projection etc.
- 8. Habits :- Eating, Sleeping and excretory functions.
- XI. Summary & Clinical Diagnosis

SECOND YEAR M.Sc. NURSING

CLINICAL SPECIALITY – II MENTAL HEALTH NURSING

MENTAL STATUS EXAMINATON (MSE) FORMAT

I General appearance and behavior (GAAB):

- a) Facial expression (E.G. Anxiety, Pleasure, Confidence, Blunted, Pleasant)
- b) Posture (Stooped, stiff, guarded, normal)
- c) Mannerisms (Stereotype, negativism, tics, normal)
- d) Eye to eye contact (maintained or not)
- e) Rapport (Built easily or not built or built with difficulty)
- f) Consciousness (conscious or dowry or unconscious)
- g) Behaviour (includes social behaviour, E.g. Overfriendly, disinherited, preoccupied, aggressive, normal)
- h) Dressing and grooming well dressed/ appropriate / inappropriate (to season and situation) neat and tidy/dirty.
- i) Physical features :- Look older/younger than his or her age/under weight/over weight/ physical deformity.

II Psychomotor Activity:-

Increase / decreased / Compulsive/echopradxia/ Stereotypy / irrelevant automatic obedience)

III Speech: One sample of speech (verbatim in 2 or 3 sentences)

- a) Coherence coherent / incoherent
- b) Relevance (answer the questions appropriately) relevant /irrelevant.
- c) Volume (Soft, loud or normal)
- d) Tone (high pitch, low pitch, or normal/monotonous)
- e) Manner Excessive formal /relaxed/inappropriately familiar.
- f) Reaction time (time taken to answer the question)-increased, decreased or normal

IV Thought:

- a) Form of thought /formal thought disorder not understandable / normal/ circumstantiality / tangentiality / neologism / word salad/ preservation / ambivalence).
- b) Stream of thought / flow of thought pressure of speech / flight of ideas/ thought retardation/ mutism /aphonia / thought block / Clang Association.)
- c) Content of thought
 - i. Delusions specify type and give example Persecutory/ delusion of reference / delusions of influence or passivity/hypochondracal
 - ii. delusions /delusions of grandeur / nihilistic- Dereralization / depersonalization / delusions of infidelity.
 - iii. Obsession
 - iv. Phobia
 - v. Preoccupation
 - vi. Fantasy Creative / Day dreaming

(Deemed to be University) Grade 'A' Accredited by NAAC

V Mood (Subjective) and after (Objective) :

- a. Appropriate/inappropriate Relevance to situation and thought congruent.
- b. Pleasurable affects-Euphoria / Elation / Exaltation / Ecstasy
- c. Unpleasurable affects Grief / mourning / depression.
- d. Other affects-Anxiety / fear / Panic/free floating anxiety/apathy/ aggressive / moods swing / emotional liability

VI Disorders Perception:

- a. Illusion
- b. Hallucinations (Specify type and give example) auditory /visual/olfactory /gustatory /tactile
- d. Others hypnologic / hypnopombic /Lilliputian / kinesthetic / macropsia / micropsia

VII Cognitive functions :

a) Attention and concentration:

- Method of testing (asking to list the months of the year forward and backward)
- Serial subtractions (100-7)

b) Memory:

- a) Immediate (Teach an address a& after 5 mts. Asking for recall)
- b) Recent Memory 24 hrs recall
- c) Remote : Asking for dates of birth or event which are occurred long back
 - i) Amnesia / paramnesia / retrograde amnesia / anterograde amnesia
 - ii) Confabulation
 - iii) Déjà vu / Jamaes Vu
 - iv) Hypermnesia

c) Orientation:

- a. Time approximately without looking at the watch, what time is it?
- b. Place Where he / she is now?
- c. Person who has accompanied him or her

d) **Abstraction:** Give a proverb and ask the inner meaning (E.g. feathers of a bird flock together / rolling stones gather no mass)

e) Intelligence & General Information: Test by carry over sums/ similarities and differences / and general information / digit score test.

- f) Judgment: Personal (Future plans)
 - Social (Perception of the society)
 - Test (Present a situation and ask their response to the situation)

g) Insight:-

- a. Complete denial of illness
- b. Slight awareness of being sick
- c. Awareness of being sick attribute it to external/physical factor.

(Deemed to be University)

Grade 'A' Accredited by NAAC

- d. Awareness of being sick, but due to something unknown in himself.
- e. Intellectual insight
- g) True emotional insight

VIII General Observations :-

- a) Sleep
 - i. Insomnia temporary / persistent
 - ii. Hypersomnia temporary / persistent
 - iii. Non-organic sleep wake cycle disturbance
 - iv. EMA-Early Morning Awakening
- **b)** Episodic disturbances Epilepsy / hysterical / impulsive behaviour/ aggressive behaviour destructive behaviour

IX Summary & Clinical Diagnosis

CLINICAL SPECIALITY – II MENTAL HEALTH NURSING PROCESS RECORDING FORMAT

I] BASE LINE DATA OF CLIENT

- **II]** List of nursing problems identifies through history, MSE and systematic observation
- **III**] List of objective of interactions based on the problem identified and learning need of
 - a) Client b) Student

(Note : The above data are obtained and recorded on initial contact. Later as each day's interactions are planned, the following format has to be followed)

2. DATE AND TIME DURATION:

3. SETTING: General ward / patient's unit

4. OBJECTIVES TO BE ATTAINED IN THAT PARTICULAR INTERACTION:

1)_____ 2)

Participant	Conversation	Inference	Therapeutic Comm Tech Used

5. NATURE OF TERMINATION OF INTERACTION:

Evaluation by the student:

- 1) Your General impression about the interaction (This could included whether TNPR maintained, use of TCT, CO-operation of client etc.)
- 2) Whether objectives achieved, and to what extent If not why and how do you intend to achieve it.
- 3) Summery of your inferences

Evaluation by teacher

- a) Overall recording
- b) Phases of nurse patient relationship
- c) Use of Therapeutic Communication Techniques
- d) Ability to achieve objectives
- **NOTE :-** Limit objectives to one or two and make all efforts to attain the objectives. At the end of the process recording mention if you were able to achieve the objectives and to what extents. If not, how you intend to achieve it and what hindered you from achieving it. Maintained a therapeutic nurse-patient relationship (TNPR) in all you interactions and use many therapeutic communications of the participants
